J. J. Peters
Another year, another book,
   To mark the path by which we came,
And when upon our work you look,
   We hope you'll view it with the same
Spirit in which 'twas written, for
   We've done the best that we could do;
And this is all—there is no more;
   Friends all, good-bye; good luck to you.
THE X-RAY
VOL. X. 1924

Issued by the students of
THE MEDICAL COLLEGE OF VIRGINIA.
RICHMOND, VA.
To show, even in a small way, our sincere appreciation of all he has done for us and all he has meant to us during our four years here, this, the eleventh volume of the X-Ray, is

DEDICATED TO

Charles C. Haskell
M.D.

Professor of Physiology and Pharmacology
FOREWORD

Into the days that used to be
Another year has passed;
In these few pages you will see
The things we hope will last;
The future holds for you and me
White pages, clean and vast,
Which we must fill, wherever we
By life and fate are cast.

We hope that at some future time
Our book may call to mind,
By story, picture, pun, or rhyme,
The life we leave behind;
And as the heights we try to climb,
God grant that we may find
Example in His life sublime
Who taught us to be kind.

IN AND AROUND M. C. V.
Yes! We Have No Salvarsan

At dispensary the other day,
In Apartment 6-0-6,
A colored man came into say
His blood was "out of fix."
He knew the stuff he had to take
To drive his ills away,
And I thought his old heart would break
When he heard the doctor say—

"Yes! We have no salvarsan,
We have no salvarsan today;
We have all kinds of lotions
To soothe the emotions,
And drive all the pain away;
We have a new kind of powder for babies,
And new serum to keep off the rabies,
But, yes! We have no salvarsan,
We have no salvarsan today."

And hardly had the man gone out
When, standing in the door,
I saw a dame who weighed about
Two hundred pounds or more.
We looked her card up, and saw there
A Wasserman, Four-Plus,
And you should have seen her tear her hair
When the "doc" addressed her thus—

"Yes! We have no salvarsan,
We have no salvarsan today;
We have ipecac, iodine,
Protargol, and quinine
To last till the end of May;
We have adhesive to fix fallen arches,
And a room full of plasters and starches,
But, yes! We have no salvarsan,
We have no salvarsan today."

Ruth Gertrude Aleman  
New Orleans, La.  
A E I

Chief Nurse, France, A. N. C., 1921-18; Doyola University; Freshman Work, Tulane University; Women’s Club, M.C.V.

The gods were good to us when, in our second year, they allowed Miss Aleman to join us from Tulane University, and to share the joys and trials of our struggle toward the coveted M.D. Of marked personality, strength of character, and magnetism, Ruth will always be a credit to our profession.

Through her earnest, conscientious adherence to the old maxim, “Work while you work,” we know that she well deserves her standing among the best in the class. The “100’s” marked opposite her name have not been at all infrequent, but don’t think she has given all her time to her studies. She is always an able critic of the most recent movie—and not from hearsay. As for her generosity with New Orleans pralines, and her talent as a cook, well, ask some of her class who know.

J. Albert Avrack  
Brooklyn, N. Y.  
Φ Β Ψ

B.S. Degree; “X-ray” Staff Three Years; “Skull and Bones” Staff Two Years; Assistant Instructor in Anatomy, Columbia University, John B. Stetson University.

Jack knows everybody at M. C. V., and everybody knows Jack. He’s a case. Present history, raring to graduate! Past history, hails from New York and Florida, half and half. Married, 6-21-20. His capacity for work is ravenous. While with us as a student of high records, he has served as assistant anatomy instructor, assistant principal of a local high school, director of a settlement house, on the staffs of the X-Ray and Skull and Bones—and what not.

Jack joined our class after leaving college for a year, due to the death of both his parents. Hard hit. Symptoms—Worryitis, studious, poetic, artistic, sentimentalist. Diagnosis—a fine student, a good pal, and a worthy to-be M.D. Sequellae—Well, Jack, old top, good luck to you. We shall miss and always remember you.
Senior Medical Class

John McKendree Bailey
Richmond, Va.
Φ X

Intern Piedmont Sanitarium Summer of 1923; University of Richmond Club.

This is another of the Richmond boys. Having won at the University of Richmond, in an embryonic way, the title of "book shark," he now, at full term, lays claim to the same title.

It is a pleasure to have been associated with John, and his fellow students have always found him congenial, sincere in his work, and always loyal to the best interests of the college. Aside from eminence gained in the pursuit of knowledge, he has proven himself efficient, par excellence, as "silent man" among the ladies. John has shown great ingenuity in dealing with the fair sex, but we feel that his winsome smile will soon (if it has not already) capture the heart of some beautiful queen.

We are glad he cast his lot with us, we wish him great success, and believe his life's work will prove a tribute of honor to the medical profession.

Robert William Bess
Hinton, W. Va.
Ο Τ Φ; Σ Φ Ε

Square and Compass; West Virginia Club.

If the stories we hear are true, Mickey (himself) McGuire had nothing on "Bob" in his boyhood; in fact, some of the stories "Bob" tells on himself put Mickey way back in the shade.

He began the study of medicine here with the rest of us in the fall of 1920, and although born a mountaineer, the city of Richmond has brushed and polished him, the ladies have loved and praised him, and life in general has been so good to him that one would look in vain, now, for any vestiges of the country or of the mountains on Robert W.

We won't try to describe him, or to detail his many virtues. Every member of the class—we could almost say everybody in school—will look back upon his associations with "Bobby" Bess as some of the pleasantest of his school year. A good fellow to study with, an incomparable companion to play with, and (to the girls, at least) just the kind of man to dance with, he goes out from school taking with him the pleasantest thoughts we are capable of. And we wish him success.

Page thirty-four
The X-Ray, 1924

Senior Medical Class

Alvah Warren Bickner
Rutherford, N. J.
ΦΣΝ; ΩΤΦ
B.S., University of West Virginia; F. L. E.; Cotillion Club.

Rah! Rah! Rah! College boy! might be one's first impression on gazing on this handsome and cultured boy's photo. But to those who know him best "Bick" is even more than this, for he has that enviable quality of adapting himself to all environments. It matters not whether he is officiating at a "pink tea," or mixing other "tea," he is always quite at home.

This mighty seaman hails from the land of cranberry blossoms—New Jersey—and there received the training which prepared him to "do his bit" in the Navy. He took his academic training at Fordham, and then, following Horace Greeley's advice to go West, went to the University of West Virginia, choosing M. C. V. for the last lap in the race toward the diploma.

"Bick" is a steady, reliable student and a real man, making friends wherever he goes. We prophesy for him well merited success in the practice of medicine.

John Mason Bishop
Iwanhoe, Va.
ΩΨΦ
Secretary Washington and Lee Club, 1921-22; Cotillion Club; Photographic Editor "X-ray," 1923-24; F. L. E.

This serious, elderly-looking chap deserves a lot of credit for finishing in medicine at such a ripe old age, at least one would think so. But that's where one would be mistaken, for John isn't really very old, neither is he very serious, except—well, we will leave that to your imagination.

John was born in the wilds of Buchanan County, Va., where, as a mere child, he received his training playing with wild oats. He was captured and taken to Lexington, Va., where he was tamed, and where he received his academic work. He then came to M. C. V., where he has stood "ace-high" both in class rooms and—other places. His hair is a trifle thin, but this does not seem to handicap him in the least.

John is an all-round man, a hard worker, and a true friend, and we wish for him the unlimited success his ability demands.
George William Black
Mt. Holly, N. C.

X Z X

North Carolina Club.

George W. Black first saw light amid the long leaf pines and hills of North Carolina. After being exposed to his academic and pre-medical courses at Davidson and the University of North Carolina, our freshman year found Black among us at the Medical College of Virginia. Most of his freshman year was devoted to "Lyrical" recreations, picking the "delicate dills," and trying to plot E. C. L. Miller’s psychological curve.

The next year Dr. Haskell’s courses proved to be his salvation. Here he began to study, learned to concentrate, and as if by magic Doctor Haskell discovered an indefatigable and searching student of the mysteries of the human body and life. It can be truthfully said that Black is equal to any occasion, and in June Virginia will render back to North Carolina the polished diamond, and will say, "You should be proud, O he hath kept the faith."

Ryland Arwood Blakey
Richmond, Va.

Φ Τ Φ

Ryland, in some ways, is in a class by himself. As far as we can recall, he never missed a dance; no one ever saw him with a text-book in his hand, unless it was the night just before a quiz or examination; still, if any professor ever stumped him with a question, or caught him napping in class, we have all forgotten it.

After sailing along through his first three years in M. C. V., and finding everything pretty soft, he decided to really have something to do during his senior year, so accepted an internship at Sheltering Arms Hospital for the session 1923-24. Even then, however, he managed quite well not to let medicine interfere with his social duties. No social gathering was ever complete without him—and we must say that his attendance at such occasions has been pretty regular. The medical profession will be better off for Blakey’s having chosen it as his life work.

Page thirty-six
The "well-rounded" man, in all save one insignificant respect, stature, is typically exemplified in James Lewis Blanton. The terrors of medicine, from anatomy to ophthalmology, have caused him no concern. Diligent and thorough in his work, yet always finding time for frivolity when the need of relaxation presented itself, he is everybody's friend, and has happily and successfully spent his four years at M. C. V.

He has seriously sought medical knowledge, and has found it in all the fullness in which it was available. As this knowledge is stored in a practical, alert, ambitious mind, along with lofty ideals, we cannot but predict for him a most successful future.

We have here another enthusiastic specimen from Southwest Virginia. Boatwright came to us from Emory and Henry College, where his desires for an M.D. degree were created, and reared to such an extent that he journeyed to meet us at M. C. V. in search of the needful knowledge. He was satisfied, perhaps, beyond his desires, and we do not hesitate to say that "Boatie" has stored away more of this knowledge than most of us.

Though he has labored hard during his entire time here, and has been seldom seen among the nocturnal homeward paraders, we have reasons to believe that his social career has been, by no means, neglected. For how many times have we seen this gentleman waiting at the doors of the "shopping center" with that anxious smile of hope, "she will be here soon."

His unassuming manner, his trueness of purpose, his willingness of mind, and his untiring humor have won for him the friendship of the entire class, and we predict for him success in his chosen profession wherever he may go.
Senior Medical Class

FRANCIS NORMAN BOWLES
CHESTER, VA.
Φ X; Ω Χ

President Sophomore Class, 1921-22; Honor Council, 1922-23; V. M. C. A. Cabinet, 1923-24; Secretary Athletic Council; Manager Baseball Team, 1921; Class Basketball, 1922-23; Interne City Home; Blue Ridge Delegato, 1925; German Club; University of Virginia Club; University of Richmond Club.

"Lefty" began his notable career in Chester, but early in life found the quiet places too small for his ever-increasing zeal and ambition, and soon set out to find surroundings more compatible with his breadth of vision. Using the Universities of Virginia and Richmond as stepping stones, he entered M. C. V. with the rest of us in the fall of 1920, and has maintained an enviable position ever since.

"Lefty"'s virtues are innumerable—a well-rounded student, an athlete of no small renown, a prominent figure in all college activities, a most enjoyable friend, a poet when properly stimulated, and, more than all these, a thorough gentleman. To know him is to like him. All this unites to make Bowles one of the most popular men M. C. V. has had the opportunity to graduate in many a day.

We know "you've got the stuff," "Lefty," old boy, and may the future bring to you the rewards you so richly deserve.

BOYD FRANKLIN BROWN
HINTON, W. VA.
Ω Τ Φ; Σ Φ Σ

Pre-Med, University of Maryland; ex-Service Men's Club; University of Richmond Club.

Boyd Franklin, better known, perhaps, as "Red," is already a doctor—at least, if he isn't, you'd think he was after a few minutes' conversation with him. Thoroughly familiar with every branch of medical knowledge in which we have been taught, he has supplemented this knowledge by reading all the medical journals. Everything in our textbooks is already "old stuff" to him, and in addition to this, he has applied his knowledge in such a way as to make him ready and competent, now, to go out and work.

But "Red" believes in doing everything well, for which reason he has accepted an internship at Memorial Hospital for next year. And all we can say is that next year's seniors—the present Junior Class—are fortunate indeed to have a man like Brown to help them over the rough spots next year.
Senior Medical Class

TIMOTHY STEVEN BUCKLEY
UTICA, N. Y.
Ω Τ Φ

Editor "X-Ray," 1923-24; Assistant Editor "X-Ray," 1922-23; "Skull and Bones" Staff, 1923-24; Cotillion Club; Richmond University Club; Historian, Senior Class; ex-Service Men's Club.

This is the eminent editor of this year's X-Ray. While serving during the World War in France, "Buck" came in contact with a number of Richmond doctors, and acquired such a good opinion of their work and the medical profession, as a whole, that he made up his mind to become a doctor himself, picking Richmond as the best place for his studies.

Buckley's big black medicine bag has been a familiar object around school for the past four years (he began to carry it when "Bil- lie" Christian first described a vertebrae for us), but analysis of the contents of the bag always checks up something like this: One copy Literary Digest, one copy Scientific American, one copy each of latest New York and Richmond newspapers, one copy of a book by Poe or Dickens. In other words, "Buck" has never let medicine interfere with the acquisition of extraneous knowledge. Withal he leaves school with a thorough knowledge of the elements of medicine, and is one of the men on whom we can count confidently for success.

WESLEY GRIMES BYERLY
COOLEEMEE, N. C.
Κ ψ

University of North Carolina; Secretary-Treasurer Senior Class; Interne Virginia Home for Incurables; North Carolina Club.

Who of us will ever forget this long-drawn out, atrophied specimen that joined the class in 1921? After spending his virgin years in medicine at Chapel Hill, Byerly came to M. C. V. He has, ever since, been one of the most popular men in school, and Garnett Nelson's protegé.

During the war he was an unassigned hero, and performed many heroic stunts from the Gulf to Canada, and from Virginia to California in the various camps that he ornamented in his shave-tail uniform. As a fitting climax to his research work in pathology, he was persuaded to give his Senior year as interne at the Virginia Home for Incurables, at which place he has helped many souls throw off this mortal coil.

Byerly is going back to his native state, and his future, as a successful practitioner, is assured.
Senior Medical Class

Carol John Carter
Fairmont, W. Va.

Carl J., also known as "Nick," blew into our historic city two years ago from the hills of our sister state, West Virginia, in quest of medical knowledge.

He is a quiet, gentle, good-natured fellow who does not talk so much, but lets his actions speak for themselves. If anyone—staff, student, or patient—asks a favor, he is always willingly at their service, and he often says that his greatest ambition in life is to do what he can to help suffering humanity. The names of the great men in medicine come from amongst those who started out just as Carter has started.

John Randolph Chitwood
Silvatus, Va.
Ω Β Χ; Φ Ρ Σ
Roanoke College; Honor Council, 1921-22; Secretary-Treasurer, 1922-23.

One bright September morn there entered the city of Richmond three lads from Roanoke College. Their hearts were aflame with medical ambitions, and their very souls were consumed with the thought of becoming "Good Samaritans." Four years have passed, and only one of the trio has survived the storms—"Geisen may marry, Peele may go, but John Randolph Chitwood goes on forever."

Rumor has it that while at Roanoke College "Chitty" was not a burner of the midnight oil, but four years of serious medical work have developed this boy from the mountains into a rare specimen of intellectuality and judgment, a gentleman worthy of his profession, and a student of the highest type.

"Chitty's" greatest ambitions are along the lines of internal medicine, and we say now that his native land will some day be proud of its offspring.
Senior Medical Class

Club; Intern City Home Hospital; Senior
"X-Ray" Representative.

Four years ago Colvard, better known as
"Steve," entered our ranks with a strong de-
sire to own a "sheep hide," and by diligent
application and faithful work he has received
"that skin you love to touch."

Serious without somberness, brilliant with-
out showiness, manly without restraint, he
is clean, white, and a true gentleman in every
respect, and wherever he may roam his con-
genial manner, common sense, and character
must win for him the same esteem in which
the fellow-members of his class hold him.
At times he throws off his mask of solemn
demeanor and tunes his aspirations to the
higher pursuits of cupid's garden, and no
Romeo ever basked so successfully beneath a
balcony as this master of hearts. And when
"Auld Lang Syne" is played, and he starts
back to "The state of the long leaf pine," M.
C. V. is sending out a son of whom she can
be justly proud.

DONALD DANIEL
WELDON, N. C.

K A

President Junior Class, 1922-23; Athletic Rep-
resentative Senior Class; Basketball, 1922-23;
Secretary-Treasurer German Club; North Caro-
lina Club; B.A.

We have often heard that a few good
things have their origin in North Carolina,
and to prove this assertion we have "Don."
He stuck to the Old North State long enough
to receive an academic degree, and in the
fall of 1920 cast his lot with the best class
ever graduated by the Medical College of
Virginia.

From "Uncle Billy's" bones, through Mc-
Gavock's skin, he has demonstrated his abil-
ity and has consistently led his classes. He
has been active, not only in scholastic matters,
however, for Daniel is one of those extraor-
dinary men, few and far between, who can
be called upon at any time for anything, and
to whom all others turn when in need of
help. Always at ease, whether presiding at
a class meeting or tripping the light fantastic,
and a universal favorite, we doubt if his
record here has ever been equaled. And we
know that his remarkable successes here will
be duplicated after he leaves.
John Andrew Gardner Davis, Jr.
Greenwood, Va.

ΦΧ;ΘΔΧ

University of Virginia.

John A. G. Davis was born, reared, and had the "usual childhood diseases" at Greenwood, Va. He did his pre-medical work at the University of Virginia, and there, incidentally, he was imbued with the democratic and patriotic spirit of Thomas Jefferson. This love of country and unselfishness John nobly displayed on Flander's Fields amid the poppies, cooties, and Germans. Returning from France, John entered M. C. V. with us in our Freshman year, eager to begin the four years' battle of the Medical College of Virginia, which overshadows any war.

Anatomy proved a mere pastime, and since entering school John has gone on, from one class to another, doing consistent work and making good grades. Now commencement finds him "The Master Diagnostician."

He has not yet decided on his specialty, but has already obtained an enviable internship at a large New York hospital for the coming year, and we confidently believe that his affability, unselfishness, untiring diligence, and genial personality predestine for him success.

David Joseph Dolen
New York, New York

David, or, as he is best known to his many friends, "Mike," is another product of the quiet little town which some of you may have heard of, New York, N. Y. He has been with us for two years, and, except for the fact that he is anxious to go back and show the people of the metropolis what he has learned, we would be glad to have him for two years more.

"Mike" has many exceptional qualities, but perhaps his outstanding feature is a truly phenomenal memory. He knows everything in all the books and, added to that, everything any professor ever told us. He could make a name for himself anywhere as the "Human Encyclopedia." But he chose as his life work the profession of medicine, and we know that great success awaits him there. He will be remembered by all his classmates as a man whom it has been a real privilege to know.
The X-Ray, 1924

Senior Medical Class

John Edwin Dougherty
Σ Φ Ε; Ω Τ Φ; Φ Σ Ν

B.S., University of West Virginia; President Athletic Association; K. of C. Club; ex-service Men's Club; Varsity Basketball.

If the University of West Virginia can keep on turning out men like "Ed" Dougherty, the Medical College of Virginia would be lucky to get them all. "Ed" has been a prominent member of the class ever since he arrived. It is largely through his efforts that our school is again prominent in the world of sports, and as president of the Athletic Association he has set a standard of initiative and force which those who come after will do well to follow.

He has given a great deal of time to other than scholastic matters; has worked hard and faithfully for the school whenever the opportunity presented itself, and his long, lean, lanky form has been a thing of grace and beauty wherever and whenever an orchestra could be prevailed upon to attend a medical college dance. But with all this he has an enviable school record, and has grown a 'tache—two things which will carry him a long way on the road to success.

Clay W. Evatt
Greenville, S. C.
Φ Χ

Square and Compass Secretary, Freshman Class, University of Maryland, 1919; Student Senate Sophomore Class, University of Maryland, 1920.

Clay, junior member of the Green Pasture Twins, came to us, wafted by Palmetto breezes, as Sophomore greatness dawned upon us. Amid the vicissitudes and inclemencies of the travail, through which we passed, he has accrued an enviable and worthy record. His amorous disposition and pleasant manner have won for him many friends, and not a few of these are numbered among the fair sex. Many are the hearts by him torn asunder before he met "her." Then it was that, as of old, "He came, he saw, she conquered."

Being possessed of the happy faculty of accomplishing a great amount of work in a short space of time, the achievements attained have but prompted him to greater effort. An independent thinker and dependable worker, he has pressed onward, and obstacles met have but served to better blend the sterling qualities latent within him. We find him a worker, a thinker, a friend, clean in thought and body, with self least at heart. In a word, he is a man, and to men belongs success.
Senior Medical Class

Nathan Benjamin Feinberg
New York, New York
ΦΔΕ

The multitudinous duties which fall to the lot of the Fourth Year medical student were not sufficient to put even a dent in Nathan's valuable time, so every time an intern in any of our hospitals felt like taking a vacation, he was ready to step in and do the work—and do it well.

In spite of this, the marks he made during the past year would compare favorably with those made by any member of our class. He has been an exceptional student, a hard worker in and out of class and, with his super-abundance of energy, we know that in the years to come he will hold a place high up in the medical profession.

He has been well liked by everyone, and well deserves the name of being "one of the best men in the Class of 1924." His plans for the future include internships in some of the best hospitals on this side of the Atlantic, and an extensive tour to some of the medical centers of Europe. No one will be better prepared to heal the sick than Feinberg when he is ready to receive his first patient.

Joseph J. Feraca
New York City
B.S., Wake Forest College

"Joe" came to us from Wake Forest after earning a B.S. degree in medicine. Diligent and unassuming, he has pursued a quiet course during his time here, and now stands ready, with the rest of us, to receive his diploma.

A strong supporter of college athletics, taking special interest in the game of "Ping Pong," and always ready to help the other fellow when the opportunity presented itself, he has made a deep impression on his fellow students. He expects to return to New York when school is over, and we feel sure that the ranks of the medical profession of the Empire State will find in him a worthy recruit. It is with the greatest sincerity that we wish him joy and happiness in the future.
Senior Medical Class

SAMUEL JAMES FERGUSON
K A, Ω T Φ
B.S. University of West Virginia; President Cotillion Club; F. L. E.

This learned and handsome looking individual first saw the light of day in the wilds of West Virginia. Even as a youth, Sam showed moments of marvelous intelligence. In his country home he soon learned to imitate the calls of many of the most famous wild animals sometimes seen on farms, winding up in a most eloquent interpretation of that particular long-eared beast of burden so familiar to country boys.

But the farm was soon to lose its little gem. After graduating from Marshall College, he attended the University of West Virginia, and after completing his first two years in medicine he came to M. C. V., where, both scholastically and socially, he has been a whirlwind.

Sam's abilities and high ideals are such that we know he will succeed. He is a credit to M. C. V., and will be a worthy acquisition to any community fortunate enough to get him.

HENRY THOMAS GARRISS
MARGARETSVILLE, N. C.
Φ X
B.A., Trinity College; North Carolina Club.

"Shorty" came to us from the Old North State with the tar still hanging to his heels, and with degrees ranging all the way from that of B.A. in academic work to D.S.C. in the World War, determined to add to his laurels the degree of M.D. Ever smiling and pleased with everything, he has easily succeeded, having divided his time about equally between Medical School, Pine Camp Patients, and Pine Camp Nurses.

Dr. Garriss is now about ready to leave us. The moustache, which he has so tenderly tended, is now showing signs of permanency, and we will always believe that the constant vibration of "Shorty's" upper lip (for when he wasn't laughing he was talking) had a great deal to do with the remarkable symmetry which the 'tache has achieved.

Down in Margarettsville the mayor and the brass band and the 1329'/2 other inhabitants are waiting with open arms for his return. And there it is known that if they can keep "Shorty" with them they will have a good doctor.
An excellent bacteriologist was lost when Miss Garst decided to become a daughter of Aesculapius, but our ranks received a great asset. Her ability as a student has been well demonstrated by her excellent standing during our four years here. Sudden emergencies hold no terrors for her, and she meets them serenely and with confidence. We all remember the days of pharmacology and physiology, when Dr. Haskell gallantly responded to her plea that she "be called on more frequently, that she might become accustomed to it."

Although quiet and demure, there is a tell-tale twinkle in her eyes indicating her keen sense of humor. Loyal to her friends, faithful in her work, with all the qualities that go to make up true womanhood, she has always used her influence for the highest and noblest things, and her memory will linger long in the hearts of her classmates.

As our class disperses she carries with her our sincere wishes for her success, and the achievement of the pinnacle of her golden dreams.

Virtuous "Willie," a one-woman man, came to Richmond for two reasons. The first was to get his coveted sheep-skin, and the second was to really get acquainted with historic Petersburg. He has succeeded in both. And if it were not for "Angelie Willie," where would his five roommates ever get notes to study for exams? We endorse him, unhesitatingly, as a worthy secretary to the surgeon-general.

"Willie" is a distinguished athlete—at the galloping dominoes and freeze-out. And "Willie" is sympathetic—for who else would refuse to draw blood for a red count because the patient was too anemic? Seriously, though, one could not wish for a more sincere friend. Lack of space forbids even the mention of his many acquirements. Optimistic, determined, and practical, a more ideal student would be hard to find. With abilities such as he possesses he is bound to win success, and when he leaves us he will take with him our best wishes for his future happiness.
This man from the North, better known as "Smiling Rudy," or "Rudolph Valentino," is responsible for many heartaches among the fair sex. Last year he almost decided to make his home in Richmond—nothing but climatic conditions deterred him.

Hailing from the Empire City, "Rudy" is a born athlete in all sports from shuffling the paste-boards to basketball, and his versatility has made him popular with every member of his class.

He has a deep love for books, for New Jersey, especially the latter, and as he rises every morning all those in his vicinity are usually treated to an impromptu solo—the love song of Marcheta. We wonder why—and he won't tell us.

Everybody knows "Rudy," and to know him is to like him. He always has a smile and a good word for everyone, and he will be an acquisition to whichever branch of the medical profession he chooses to follow.
Senior Medical Class

CHESTER EDWARD HABERLIN
BRIDGEPORT, CONN.

B.S., University of West Virginia.

During the World War this friend of ours began his educational career in the New York University. From there he went to the University to begin the study of medicine, coming to Richmond in the fall of 1922 to finish his journey toward the much-to-be-desired diploma.

Haberling does most of his school work by close attention during lectures, making the extensive use of books outside class unnecessary. For that reason he has never seemed to study hard, although reports from quizzes, exams, etc., always found him standing well up in the list.

A good conversationalist, cheerful, happy, always smiling, he is at home everywhere, and these inherent good qualities, added to the well-kept mustache which adorns his upper lip, clothe him in a dignity which is well suited to the practice of medicine.

“Chris” will make his mark—and he will never grow any grey hairs doing it.

LUCY SCOTT HILL
LOCUST DALE, VA.

A E I

University of Richmond.

From that first day, back in 1920, when the present graduating class first entered “Uncle Billie” Christian’s lecture room, to listen to him describe in such a masterly and colorful way a cervical vertebra, Lucy, as far as scholastic work is concerned, has been “one of the boys.”

The entrance of women into the medical field is a comparatively new thing, but if there are any more like Miss Hill searching for a place in our profession, send ’em along. Along with her innumerable other qualities, Lucy—to be brief—is just naturally sweet. And we couldn’t say any more if we wrote a book about her. She is on her way to great success and she’ll get there in record time, too.
"Ned" Holderby is one of those quiet boys whose knowledge is indirectly proportionate to the noise he makes. M. C. V. has seldom, if ever, graduated a man more competent to go out and take up the arduous duties which fall to the lot of the physician.

The word "gentleman" describes him completely. In his entire time here he has never made an enemy, but he has made innumerable friends. Those who know him best can appreciate his many admirable qualities, and those who do not know him have certainly missed something.

"Ned" takes with him the best wishes of every member of his class. If he achieves half the success we wish him, he will climb high and far before he stops.

To Henry belongs the distinction of being the youngest member of our class, but, though young in years, he has traveled much. Starting from Norfolk, he has pursued knowledge in many different forms and places, as will be seen by the above list, and he came to us thoroughly versed in all the ways of college life.

To summarize his character in one word, you would say "frankness." If he has an opinion, he is fearless to express it, and this characteristic has won for him many friends. As a student his four years here have been an uninterrupted procession of successes. This capacity of doing whatever he sets out to do will undoubtedly he continued on into his professional career, and we venture to prophesy that, in after years, his opinion will often be sought whenever a question of difficulty in diagnosis arises. Henry has all the makings of a man, and our good thoughts go with him when he leaves us.
Howard is a man who always got along fine with all his instructors, for, being married, he knows that when you don't want to do as you are told to do, the thing to do is to compromise—and do it. He joined us in our junior year, having put in two years in medicine at Wake Forest, and was a welcome addition to our class. Rather quiet (another characteristic of married men), he made plenty of noise when quizzes and examinations came around, always making good marks and standing well up in the class in the matter of scholarship.

He has been well liked by everyone, and goes out into the world of medicine carrying the good wishes of all his associates. He is the kind of a man who says little and does much, and though we will never hear him tooting his own horn, his work will be the kind that must command recognition, and someone else will do the tooting for him.
This young man came to us after receiving his pre-medical education at Randolph-Macon College, where his scientific investigations of the amphibian filled him with inspiration and determination to possess a degree of doctor of medicine. Since entrance here he has worked hard and diligently, and has proven himself one of the best of students.

But we must not pass over the romantic side of our colleague's life without mention, for he has shown remarkable development in this science as well as in medicine. When we first knew him he was rather reticent in his attitude towards the fair sex, but now, due to his nocturnal persistence, we are ready to vote him the star of the class in that line.

As president of the student body he has given us all an opportunity to know and admire his excellent qualities, and we see for him a successful and accomplished career.
Senior Medical Class

DAVID WRIGHT KELLY, JR.
CULPEPPER, VA.
Φ Τ Δ; Φ X

University of Richmond; Honor Council, 1919-20; Intern City Jail Hospital, 1923-24; University of Richmond Club.

Kelly, as the name implies, is Irish, and, like many of those hailing from the Emerald Isle, he possesses that bulldog tenacity of purpose which gains its end. At an early date (back in knee-pants days) he began preparing for the study of medicine by working at the home town drugstore, rolling pills, mixing various concoctions, and doing any minor surgery which came his way.

During the World War he served in Uncle Sam's navy as pharmacist's mate and all of this training, together with an abundance of common sense, has made "Phylum" (as he is known to us) one of the most practical men in the class.

But don't think Kelly devotes all his time to work and study. He likes a good time, and has it. Neither is he averse to the charms of the ladies, though, unlike most of us, he has a 'specialty,' and we fear it will not be long before he joins the ranks of cupid's victims.

For such a prince of good fellows as Kelly success is certain.

LEO LEONARD KLEIN
NEW YORK CITY
Σ Π II

B.S., University of West Virginia; Pre-Med., New York University.

With the influx of students to M.C.V. in the fall of 1923, Klein made up a big part of the contingent from the University of West Virginia. Born in "little old New York," Klein took his first two years in medicine in the seaport town of Morgantown-on-the-Monongahela, and decided that Richmond was the best place in which to put the finishing touches on his medical education.

Klein is big in many ways—big in body, big in heart, and big in ideas; in other words, he is just the kind of a man that will make a big doctor. His favorite sport seems to be thinking, and we doubt if there is another set of brain cells in the school that does as much real work with as little apparent effort as those living under Klein's big hat.

Whether he will be a pediatrician, or a specialist in nervous and mental diseases, we don't know, but whatever line of work he takes up, success is his.
Senior Medical Class

**LUTHER RUSH LAMBERT**

**WELCH, WEST VA.**

Φ Χ; Φ Σ Ν

Wrestling Team, University of West Virginia; Salem, Va., High School; B.S., University of West Virginia; Hospital Corps, United States Navy.

"Greek," as he is known to us, came to Medical College from the University of West Virginia two years ago, bringing with him a B.S. degree from that institution. During the World War he served with honor in the hospital corps of the navy, and at the time of discharge from service was ranked as chief pharmacist's mate.

Being of the robust, athletic type, he took an active part in athletics while at the University of West Virginia. He is a man of sterling qualities, having fine judgment, a likeable personality, and the ambition to learn the why and wherefore of everything, which is a prerequisite for the successful practice of medicine. Therefore, it is not out of order to prophesy that we will hear from him again.

**ALVIN DAVIES LAMBERT**

**NEW UPTON, VA.**

Φ Β Η

Virginia Polytechnic Institute; Interne, Medfield State Hospital, Massachusetts; V. P. I. Club; F. L. E.

Medicine is to "A. D." what love is to woman. He came to us from V. P. I., and since the day he entered school has played his part well.

Like the rest of us, he has had his obstacles to overcome, but pertinacity and stick-to-it-iveness have brought him successfully through every battle. A gentleman in every sense of the word and possessing rare ability, he has won the respect of all his fellows.

Just one secret our X-RAY is unable to reveal. How has he managed to trip that mean, elusive toe, and yet escape the "powers that be?" It is our assumption that no lady has yet been able to get a lease for life on his affections—but we've been fooled before.

In speaking of the future, "A. D." will succeed wherever he goes. And he takes with him the good wishes of all his innumerable friends.
Senior Medical Class

CLARK F. LEMLEY

STAR CITY, W. VA.

Φ X

University of West Virginia, B.S. Degree.

"Gentlemen of the Academy of Medicine and visitors: We have with us tonight a man whose work is known to all of us, one who hardly needs an introduction to an audience of medical men. I take great pleasure in introducing Dr. Lemley."

We predict that the above introduction will not be uncommon ten years from now. Lemley did his pre-medical work at the University of West Virginia, securing there a B.S. in medicine, and came to M. C. V. for his last two years. Small in stature, during his four years as a regular on West Virginia's pitching staff, the sport writers never failed to give the "diminutive southpaw" plenty of space in the headlines of their sport columns.

Lemley is the personification of energy, efficiency, and straight thinking, a believer in honest dealings with his fellowman, and possesses in a high degree the admirable quality of frankness. He is bound to succeed, for his vocabulary does not include the word "failure."

THOMAS DENNIS MARTIN

BALTIMORE, MD.

Representative Honor Council, 1923-24; Y. M. C. A. Student Cabinet, 1923-24; Intern at Roanoke Hospital, Summer 1922; Richmond College Club; K. of C. Club.

All of us remember "Tommy" Martin, and it was one of the saddest events of our four years here when we learned, shortly after Christmas, that he would not be with us on the night of graduation. "Tommy" was a charter member of our class, and one of our best students, always faithful and conscientious in his work, and a wizard when it came to finishing up quick in quizzes or examinations. Twenty minutes was a long time for him to write on any quiz and his marks were always of the best.

Illness, however, prevented him from finishing the work so well begun. We have missed him, and we all sincerely hope and trust that some time in the future he will return to M. C. V. and reap the reward of his efforts as a member of some later graduating class.
Senior Medical Class

William Frederick Matthews
New Church, Virginia
Business Manager Skull and Bones, 1924.

Starting from the little town of New Church, Va., Matthews, quietly and unostentatiously, has traveled the rocky roads of education with apparently little real effort, but with unusual success, until, along with the rest of us, he now stands ready to receive his degree of Doctor of Medicine.

M. C. V. has never sent out a better man than "Billie." Even the fine work he has done as a student has left him with plenty of time to spare, and this time has always been at the disposal of his friends and the school. It is due, in a large measure, to his efficient work as business manager that we have again had the privilege of receiving, each week, a real school paper, the Skull and Bones. He carries with him, as he goes away, the best wishes of all of us. We all owe a lot to "Billie," and we know that, if the rewards of life are commensurate with ability, he will make good in a big way.

William Hayes McCarty
Chatham Hill, Va.
Φ Ε Η
Business Manager "X-Ray," 1924; Southwest Virginia Club; German Club; F. L. E.

"Mac," a product of the Blue Ridge Mountains of Virginia, came to M. C. V. after receiving his B.A. degree at King College. His social activities, which were marked at his academic alma mater, have become accentuated during his four years stay in Richmond.

But not only among the ladies is "Mac" popular, for he has a great number of friends in his class and throughout the whole school, and it is by this one of his many admirable traits that we choose to remember him.

As business manager of the X-Ray he has shown keen business ability, and this book is a testimonial of his hard work to make it a success. As we are about to part and enter the profession, we wish to predict for him the greatest success, and we know that his sterling qualities will soon earn him a place in medicine.
This is "Mac" himself, the man who can do more work and make less noise than ninety-five per cent of the men who ever came to M. C. V. To see the way "Mac" does things anyone would think he couldn't make up his mind whether it was worth while beginning or not; but inquiry generally shows that instead of just beginning, he is all finished, packing up to go home.

After seeing service in the World War, "Mac" joined our class quietly and unostentatiously as a Junior, and ever since has gone about his work in a sincere, business-like manner that has kept him well to the fore in all his classes. It is sometimes hard to find out just what he has been doing "the night before," when he wasn't studying, and his usual explanation, "Oh, I just took a walk," is often doubted, but we are all sure that whatever he was doing, it was all right. Everything he does is all right—and we know he is going to make an "all right doctor."

With the thought in mind that it would be a good idea to add a little southern culture to the scholastic requirements necessary to the practice of medicine, McDermott headed south from the little country village that has been described by O. Henry as "Bagdad on the Subway," and pulled up at Richmond.

He came to us in our Junior year, and we all know a lot of funny stories and witty sayings now that we were ignorant of before he arrived. He has been an acquisition to the class and to the school. We don't know yet what he is going to do when he graduates, but we do know one thing, and that is, no matter what a man's ailment may be, he will be better off for a few minutes' talk with this gentleman from Greenwich Village. "Mac" could make anyone laugh—why, we saw him make "Shorty" Garriss smile once!
When the Class of 1924 first met, back in the fall of 1924, as Freshmen, a big part of said class was made up by "Mac." We won't try to tell what kind of a student he has been—sufficient to say that any time he got less than 90 or 95 on a quiz or examination, he considered it as bad as most of us felt when we got less than 80.

Living in Richmond, he did his pre-med work at Richmond University and then, coming to M. C. V., continued the good work he had been noted for at Westhampton. After graduating, he is going to act as understudy to Dr. Horsely for awhile, and then go to work for himself.

He is called "Mac" by his friends, Ambrose by his mother, but the title he is fondest of is "Brose." And, having received advance information that he is soon to be married, all we can say is that "Brose" and the young lady who calls him that are both mighty lucky.

Back in the long-past days of our Freshman year, when Doctor Hoskins was "busting" us all in embryology and histology, Morales showed his "spunk" by proving to said Doctor "H" that she was wrong every time she gave him a grade below eighty. And, in the language of the once eminent Couie, "every day, in every way, he has gotten better and better" ever since.

Coming to us from the far-off land of Porto Rico, E. Garridos is a credit to his native, as well as to his adopted, land. Never a bookworm, still his marks would be a credit to any man. When the roll was called before classes (and he was there) he made his presence known to the professor by his respectful "Here, Sir!" And though often late for classes, he was always among the first to get to the mail box—morning and afternoon—and collect his never-failing letters from someone in West Virginia. West Virginia has caught many good things, and if the lady from that state catches Morales, it will be another star added to the flag of that old state.
Senior Medical Class

Harold Neifeld
Brooklyn, New York
Φ Δ Ε

Having decided to become a doctor, Harold left behind him the busy streets of beauti-
ful(?) Brooklyn and, desiring instead the
great open spaces of wild and woolly West
Virginia, headed for Morgantown. After
two most successful years there, he came
to our school, and is now ready to receive
his sheep-skin.

The literary world lost a shining light
when Neifeld took up the medical profession,
for he can dip a rusty pen in a dusty ink-
well any time and reel off poetry that would
make many a paid lyrical artist envious. His
effusions have often graced the pages of
the Skull and Bones. Look through this annual,
and you'll find some of them also.

But poetry is a sideline only with Neifeld. He has decided to give his life to the pursuit
of the healing art, and we consider the com-
munity in which he decides to practice ex-
ceptionally lucky.

Ward Edwin Newcomer
McClellandtown, Pa.
Φ Z X; Φ X

In the future hall of fame will be found the
name of Ward E. Newcomer. Whether this
greatness will be achieved in the ministry or
in the realms of medicine we do not know,
but we are quite sure that in whichever
sphere he chooses to work it will be for the
uplift of humanity.

Newcomer joined us as a Junior in the fall
of 1922, after having put aside the study of
medicine long enough to help Uncle Sam in
the quarrel with Germany. The necessity of
his faithful attention at the Fourth Street
Clinic has made it impossible for him to
give all his time to the study of medicine,
but nevertheless his scholastic work has never
been neglected, and he goes out from us with
a record of work done of which any man
might well feel proud.

Our best wishes go with him in his chosen
field with one suggestion—a certain member
of the F. F. V. only awaits the opportunity
to help him on in his journey towards suc-
cess.
Senior Medical Class

ROY LEE NOBLIN
NELSON, VA.
Φ Ρ Σ
Masonic Club; North Carolina Club; Interne Club; United Hygiene Hospital; Cadllion Club; Chatham Training School; University of North Carolina.

Back in our Freshman year we knew "Nob" only as an energetic young man searching for a diploma, but once having gotten his school work well under way, he blossomed out into one of our brightest social lights, and has since divided his time between business and pleasure in a way which has made many of us envious. All the ladies have succumbed to his winsome smile, and, although no one has ever accused him of a single shake at the well-known dill-tree, he has invariably made good grades.

Regardless of the protests of his countless lady friends, he seems determined to remain single, and to hang his shingle up in some wholesome rural district. We can see him now, riding along the rough country roads in the wee small hours of the morning, but over whatever roads he is destined to travel, we know that for "Doc" they are all bound to lead him to success. Good luck to him until we meet again.

WILLARD SIGSBEE PARSON
WILKINSBURG, PA.
Φ Β Η; Ο ΝΕ
University of Michigan, 1917-18; University of Maryland, 1919-22; Vice-President Student Council, 1921; Interne Bayview Hospital, Baltimore, 1921; Interne C. & O. Hospital, Clifton Forge, Va., 1923; Masonic Club.

Sigsbee, a worthy replica of the original admiral, hails from the Smokey City, bringing with him a resplendent tuft of underbrush flourishing on his labium superiors. He joined us in our Junior year. Having waxed extremely interested in plastic surgery, he has taken unto himself an "accessory rib." The operation was a complete success.

It is by his insatiate appetite for knowledge and study and wonderful application that he has merited so just a prize as to receive one of the eight-hour appointments to the hospital division of the Medical College of Virginia. We unanimously rejoice with him in his determination to become, in the future, one of the most eminent gynecological surgeons in the Middle West, knowing that with such as he success is inevitable.
Senior Medical Class

Charles Phillips
Brooklyn, N. Y.
Φ Δ E

B.S., University of West Virginia.

Before coming to us, in our third year, Charlie spent the necessary time at the University of West Virginia, where he acquired quite a lot of English, and so proficient did he become in that language that he was unanimously appointed chief literateur of the S. I. He was also a popular member of the Loyal Order of Beowolfs.

His favorite bet is that he can take a certain “dame” out—and he usually wins. Everybody knows that he doesn’t cuss, and he has a lumber index of which he can well be proud.

His congeniality has won for him many life-long friends among his classmates. He is a gentleman and a scholar, always doing the right thing at the right time, and we predict for him a career as a dermatologist which will soon bring him into the limelight. We all wish him success, and know that he will meet with it soon.

Ulvert Ottway Sanders
Oceana, W. Va.

Emory and Henry College; West Virginia University.

The one man that everyone knows at M. C. V. is “Pop” Sanders, and well does he deserve the name, as he is the father of three robust mountaineers.

Sanders has only one weakness, and that is his undying devotion for the “Missing Link.” Due to this secret devotion “Pop” decided to finish medicine here in spite of many difficulties.

“Ulvert Ottway” did his pre-medical work at Emory and Henry, went from there to West Virginia University, and then joined our class. He has been a hard worker, and has made a record deserving of high praise. “Pop” is a friend of everyone, and his greatest fault is his close association with a long lanky guy and a short fat mustached individual.

This young doctor has decided to give his talent to the Mountain State, and there among the coal mines we know he will make a name for himself and for his school.
“All good things come in small packages,” and George qualifies here. He originally hails from the home town of all true cake-eaters, but while here has won for himself an enviable record as a scholar, good fellow, and dancer extraordinary. He is also an adept in the age-old art of osculation, practicing this proficiently even under the greatest difficulties—for instance, through the iron bars of the Pennsylvania Railroad Station.

George's ready smile, warm handclasp, and good fellowship have won him the friendship of all his fellows. To say that he is conscientious, optimistic, and intensely practical is to mention only a few of his assets. His motto, and one to which he rigidly adheres, is “Honesty, Industry, and Perseverance,” and if he takes out into the world all of the admirable qualities which he has displayed during his two years with us, he'll be close to the top before very long.
Senior Medical Class

Ernest Clay Shull
Winchester, Va.

B.A., Washington and Lee; Intern at Sheltering Arms, 1923-24; Square and Compass.

Shull, called anything from "Skull" to "Old Schule," fairly radiates sunshine, heat, and merriment, but is also a clear-thinking scholar, as shown by his record at M.C.V.

After graduating at Washington and Lee, Shull served throughout the World War with Base Hospital Unit 41, where he learned the gentle art of giving anesthetics in the way of jokes as well as with ether, which position he retains at Sheltering Arms Hospital. After the war he entered Johns Hopkins University, but later drifted back to his home state, and he has made an excellent addition to the Class of '24.

Even if Shull is obese, at times awkward, and sports a yellow shirt like "Douglas," he possesses, among his many other good qualities, the invaluable characteristic of making many friends. He will some day be a huge success, and whether he becomes an orthopedic surgeon at Memorial Hospital or the possessor of a Ford, traversing the muddy roads of Virginia, endeavoring to render aid to all sending out their "S. O. S.," his future as an eminent physician is assured.

Allen Barry Sloan
Charlotte, N.C.

B.A., North Carolina Club; University of North Carolina.

Four years ago the Old North State shed briny tears as it bid farewell to this blushing, winsome youth. The years have passed rapidly, but "Time" has done his work well. Originally a natural Downhaber, crude in body, humble in spirit, and slow in speech, he blossomed and bloomed into the man we know today, a Charmer of the Fair, and a mark for the rest of us to shoot at when it comes to social endeavor, clothes, or manner. Now that he is ready to return home, we doubt if the people will recognize him when he gets there, but as soon as they get used to the metamorphosis which has occurred, and realize that it is all for the best, "A. B." will do just as well practicing medicine as he has done scholastically and socially.

All of us will miss "Al," but we feel sure that his future will be spent, profitably, amongst his own people, and that the road ahead of him will be bright and prosperous. Good luck!
Senior Medical Class

WILLIAM EDWARD SMITH
FARMVILLE, VA.

K Ψ
Hampden-Sidney; Randolph-Macon.

Farmville, Va., contributed this boy to our class, and the town may well be proud of its representative. "Smittle" prepared for medicine at Randolph-Macon and Hampden-Sidney. One of the youngest in the class, he possesses the faculty of making hosts of friends who cling to him tenaciously, being one of the most popular men in college. Formerly he could easily have been called a ladies' man, but he now seems to be the exclusive property of one and one only—a native of Farmville, like himself.

"Smittle" has made a splendid record as a student, and as a man he has everything to make his alma mater and his friends proud of him. And we predict that he will write his name high up in the annals of the profession to which he has decided to dedicate his life.

JOHN WILLIAM STRAUGHAN
SLIVER CITY, N. C.

If we had a page and a half, instead of half a page, to write on, we might be able to tell a few of the things that are to be told about Straughan. But it can't be done, so we'll have to content ourselves with saying how sorry we are not to be able to list his many virtues and (s-s-s-h-h-h) vices.

However, like the rest of the North Carolinians, Straughan is able to speak for himself, so he'll never feel the loss of an adequate write-up. He has been with us only two years, but during that time we have learned to know him for what he is—a fine fellow and a conscientious student. It has been reported (though never confirmed) that one night just before a quiz he almost studied! But he never failed in anything; was always well represented when marks were posted, and when the final records of the Class of '24 are posted we know he'll be well represented there also.
Stuart came to us from the sedate and stately college of William and Mary, the alma mater of many illustrious Americans. To say he has held high the traditions of that college is putting it mildly. With the same enthusiasm which was his chief characteristic as an academic student, he has assumed his duties amongst us, and well has he accomplished his aim.

Stuart's inherent love for the medical sciences was revealed when he occupied an assistant's chair at William and Mary, and while here his keen insight and inquisitiveness have steadily broadened him in every way. M. C. V. is proud to acclaim him one of her sons.

He has that rare combination of brain and humor which counts so much in life, and if thinking power, pleasing personality, tact, patience, and "grit" mean anything, a successful career is the future of our friend and classmate. We wish him all success and happiness.
Senior Medical Class

Clive Allen Thompson
Bel Air, MD.
Φ Ρ Σ

"Timmym," as he is universally known, after receiving the degree of B.A. in medicine from Wake Forest College turned his footsteps towards the Medical College of Virginia to continue his course of study in medicine. Though he has been here only two years, he has won a host of friends who will watch with keen interest his future career.

Thompson is a man of noble character in whose life principle governs and guides. His word is his bond, and he may be trusted with any responsibility. That he is destined to be a successful physician is only to be expected, for, during his work in college, he has accomplished, in a most creditable manner, everything to which he has turned his hand.

Success is his—what else could be added?

Coy Tillman Upchurch
Apex, North Carolina
Φ Ρ Σ
B.A., Wake Forest; North Carolina Club.

There are a whole lot of things we would like to say about Upchurch, but space is limited, and it is hard to tell where to start—harder still to tell where to stop. He came to us from North Carolina via Wake Forest College, continuing here the fine work for which he was marked at that institution. He is another of those men from whom we hear but little until marks are posted—that is, as far as scholarship is concerned.

Outside of class and school, however, we hear of him, and hear from him frequently. Socially, he stands out like a white shirt in a coal yard, a favorite with both sexes, and one who always added a great deal to any gathering he favored with his presence. If he has decided what he is going to be after he gets his diploma, he hasn't told any of us, but the chances are that he will first get married (men like him aren't allowed to stay single very long) and then, beginning to take life seriously, pick out some specialty, bring to it the same enthusiasm that has marked his scholastic career, and climb to the top in short order.
From the land where the still air of night is continually stirred by the busy buzzing of monster mosquitoes, Urbanski came south to get a medical diploma which would enable him to go back and take care of the Jerseyites, who, like himself, had been compelled to spend all the dark hours beneath a mass of mosquito netting. Now he is on his way back, with the diploma in his pocket.

Urbanski has been with us only two years, but during that time we have learned to know him for what he is—a straight, clean, upright fellow, who took more pleasure out of helping others than many selfish people get from helping themselves. Usually bright, the study of medicine has been easy for him. He has a good grasp on all the principles of the science he intends to follow, and we wish him all the success which is his rightful due.
Senior Medical Class

HARRY HUDNALL WARE, JR.  
DUNNSVILLE, VA.  
Ω ∆ Χ; Ν Σ Ν

William and Mary College; Y. M. C. A. Cabinet, 1922-23; Tidewater Club; William and Mary Club.

Among those faithful ones who have borne the heat and burden of the four years at M. C. V., we have here an outstanding example of the Old Dominion's own. Ware is a man of few words and much action, and altogether quite a unique medical student, as his records affirm. This neophyte is a man of one idea divided by two, his world having two great goals—medicine and a sweetheart. Now we have solved the mystery of why this lean, fair youth visits Washington, D. C., four weeks when Congress is not in session. H. H., Jr., is liked and respected by all his classmates, and we wish him good luck and a successful career.

THOMAS BOOKER WASHINGTON  
WOODFORD, VA.  
Π Κ Λ; Φ Χ

Class Historian, 1921-22; Vice-President Junior Class; Class Basketball Team, 1922-23.

Caroline County is responsible for this product, and she should indeed be proud of her offspring. "T.B." joined our class after having made an enviable effort in his pre-medical work, and while with us he has continued to twist the "profs," not by being a book-worm, but by possessing that inherent quality of acquiring knowledge quickly and assimilating it properly for future reference. This has given him ample time for diversion, and he has spent it wisely, socially and otherwise. His manly qualities and affable personality have caused many heart-aches among the fair sex, but "George" is still a free man.

The past four years have increased his friendships manifold, which is sufficient testimonial as to his popularity. No man in class has a more practical mind, is a better student, or more ambitious, and we know that his achievements here are only stepping stones to his successful career as a physician.
Rachel Fletcher Weems
Ashland, Va.
A E I

Normal Graduate, Harrisonburg, 1917; University of Richmond; Woman’s Club.

This is Dr. Rachel Weems, of the House of Weems, Ashland, Va., one of a long line that dates straight back to the Mayflower. Rachel had no need to tell us this—we would have guessed it ourselves any way.

A charter member of the Class of ’24, she has acquired more knowledge, on a greater number of topics, than anyone we know. Professionally speaking, she possesses the invaluable faculty of making the symptoms fit her diagnosis, then inveigling the staff to agree with her in private conversations on the wards.

These admirable characteristics, together with the fact that she is an all-round good companion, one who comes right out “when a feller needs a friend,” will go far to make her a success, and we prophesy that it won’t be long before some community will be proud of “our lady doctor.”

Francis Willard Moody White
Windsor, N. C.
Φ X

B.A., Wake Forest College.

One needs no self-proclamation from Moody as to the land from which he came to us. Know, then, that he is one of the numerous foreigners in the class, having begun life in the sand hills of North Carolina.

Moody is now interning at Stuart Circle Hospital, and for the sake of his patients we are glad that it is not within audible range of the Lyric. For if the strains of “rag-time” should reach him while at work, he might, in his hurry, “jazz” things up a bit when said patient’s welfare depended on cool and collected action.

Moody is a lover of “mountain air,” “brown eyes,” and “dark hair,” and there is a rumor of a “Mrs. in the air.” The whole class extends to him best wishes for his success.
Senior Medical Class

JAMES M. WHITFIELD, JR.
RICHMOND, VA.

Phi X

President Freshman Class, 1921; "X-Ray" Representative Junior Class, 1922; University of Richmond Club; Square and Compass Club; M.A., B.S.

"Jim," senior member of the "Green Pasture Twins," is tall and handsome. The bountiful endowment of report, never failing, effervescing and evulging, revivifying and invigorating flow of the king's English, joviality and smile, aquatic accomplishments and ardor of scientific achievement, assure us that "Jim" would have been a happy success in any line of endeavor.

"Dr. Jim" is the original Lothario, for with even the most ingenuous Girl Scout or most wicked vamp he is equally masterful. This man would have made a great statesman—his reasoning defies refutation. Before his silvery argumentation Douglas V. and J. Allison both must be satisfied to shine with but reflected glory.

We earnestly hope that good fortune will continue to smile on "Jim" as he strives onward and upward, ever achieving, ever succeeding, and ever contributing greatly in his chosen field.

PAULINE WILLIAMS
RICHMOND, VIRGINIA

A E I

University of Richmond.

Mrs. Williams (she's married, you know, and, therefore, we must be dignified) began the study of medicine as a charter member of the class four years ago, coming from the University of Richmond. Before the first week of school was over she knew so much about a cervical vertebra that she could give even "Billie" Christian a run for his money, and this thoroughness she has given to each branch of study as it was presented to us.

The study of medicine by the (one-time) weaker sex is still rather new, but if our profession can attract a few more like Mrs. Williams we sincerely hope that the number will grow year after year. She has been a credit and an asset to her class and to her school, and we know she will make a worthy addition to the ranks of those practicing medicine.
From the far-off land of Arkansas (we'd describe it, but you wouldn't know where it was even then) Williams started out on the trail of the M.D. diploma. He sojourned elsewhere until he got within striking distance of same, and then came to Richmond to put the finishing touches to his educational career. Said touches have now been applied, and Williams, as he would say himself, is now a "sure-nuff" M.D.

Although he has firmly believed in enjoying life, he has never let himself become a hermit or a bookworm. In fact, his unusual success as a student has been due to his ability to absorb more from lectures than many men can get from hours pouring over a book. However, wherever he acquired knowledge, he has it, and is now ready to go out and give other people the benefit of his diligent efforts.
Senior Class History

Our years ago we climbed aboard the good ship "M. C. V." and set our sails to breast the gales to the harbor named "M. D." Our anchor weighed, our course we laid, and tried to lay it right, and now at last, the voyage past, the harbor is in sight.

We started out without a doubt that we would make the grade, and each one knew that he’d come through, unfearing, unafraid. We had our fights, and many nights, laid flat upon the deck, and morning’s sun found many a one a sad and hopeless wreck; but back to the wheel, on an even keel, we breastied every wind, and laughed in glee to see the sea foam angrily behind.

The first year out we tacked about like any new-made "gob," and returned the shot, fired thick and hot, by Billie and by Bob. Anatomy and Chemistry made many a good man sore, but the first year done, each man had won the title, "Sophomore."

As we journeyed on the murky sun grew hotter every day, obscured by clouds like funeral shrouds that never rolled away. Close by was seen a submarine—for a moment, each man shook, for on it came, and we saw the name, "Ward Hyperplasia Cook." We saw it grope with its periscope, prepared to start a fight, but we cut it down, watched its captain ‘drown. Ah! that was a happy night. The whole thing sank to the depths so dank, except the sturdy rudder, and that we found, as it floated round, for Doctor "Tubby" Scudder.

The "Charlie C." we found to be a friendly privateer, which used us rough, made us do our stuff, but passed us with a cheer. The "E. C. L." frigate gave us hell, and left a few men lane, and one dark day we were held at bay, but we passed it just the same. One day, with joy, we saw a buoy bob just before our prow, and we passed it by with a hopeful eye, for we were Juniors now.

On, on we fought, though some got caught high up among the riggin’s, as they climbed the mast from questions asked by Admiral W. Higgins. By this time we were used to sea, and almost bullet-proof, and covered long miles beneath the smiles of the flagship Vander Hoof. And one bright day, as we made our way across the rolling sea, we saw just ait a small, trim craft, the Baughman boat, "O. B." With a semaphore it showed the shore that shone not far away, and with the Nelson’s aid we anchor weighed in the shades of Senior Bay.

We rested there in the clear, bright air that bathes all Fourth Year men, and, taking on stores, we left those shores and journeyed on again. The sky had cleared, and straight we steered, with aids on every hand, the Willis light shining clear and bright on Graduation Land.

The Coleman Crew, and the Peple, too, were among the ships we spoke, the Preston and the Hutchinson, the Graham and La Roque. So it has not all been storm and squall, by winds and bullets peppered, when about to fall there was the Call to lean upon, and the Shepherd. So we kept our nerve, and didn’t swerve—we knew that
we were winnin'—helped on in the fight by the J. A. White, the Brinkley, and the Grinnan. It was men like these that eased the breeze, and eased the bumps and bobbins, the Michaux the Hill, the Price the Gill, the Williams and the Robins.

And now that our ship has finished the trip, we are leaving the M. C. V., and each alone, in a ship of his own, must sail another sea. But if we are brave we will ride each wave as we in the past have won, that the Lord of All, at the last roll call, may say, "Well done; well done."
GETTING UP EXERCISE

A GOOD KNEE MOVEMENT

100 YD. DASH TO A FIRST HOUR CLASS

WEIGHT LIFTING

ANOTHER VIOLENT EXERCISE

PACKING UP EXERCISE

SITTING UP EXERCISE

EXERCISING A NICE, TENDER STANCE

THROWING THE HAMMER
Cheer Up!

When you're tired out, and heavy, and weary,
When things seem a little bit blue,
When the road on ahead seems so dreary,
And nothing is right that you do,
Cheer up! Buckle down, and go to it;
Don't pity yourself, and don't fuss;
Every man teaching had to go through it;
They were once just poor students like us.

For Vander Hoof once had to study;
Johns, to cut some poor stiff all apart;
When Nelson or Call did not know it all,
When it comes to the lungs, or the heart;
Even G. Paul LaRoque was a student,
With somebody riding his frame;
They were all, at some epoch, imprudent,
But they're all at the top, just the same.

Time was when, perhaps, Doctor Michaux
Wasn't sure that he ever would pass;
When Coleman knew not one brain fissure;
When Joe White came late to a class.
Although now, as with wisdom they fill us,
And know every bump on a bone,
Just remember that even "Doc" Willis
Had it all to learn once, all alone.

Doctor Haskell, in some by-gone seasons,
May have "knocked off" his "Lab" dogs too quick;
When Merrill didn't know all skin lesions—
Wasn't sure of which title to pick.
Even E. C. L. once crammed for quizzes,
   To know every microbe by name,
And Hutcheson couldn't say, "This is
   What it is," when to school he first came.

So remember, next time you get lonely,
   And think you are getting it worst,
That you aren't, noways, the only
   With lack of omnipotence cursed;
Every doctor you know had the same row to hoe,
   The same stone-strewn valleys to plow,
But they didn't stop till they got to the top
   Of the hill—and just look at them now.
The Medical Call

There comes a call from the mountain side,
There comes a call from the dale below,
A begging plea for skillful help,
In soothing pain and quieting woe;
A call for you, and a call for me,
A call for all at M. C. V.

Then from the towns come similar cries
For medical help and healing aids,
To drive out germs and swat out flies,
And check disease in ravaging raids;
A call for you, and a call for me,
A call for all at M. C. V.

The cities, too, join in the call,
And want the best the states supply,
To make life longer and the death rate fall,
And forever keep their standards high;
A call for you, and a call for me,
A call for all at M. C. V.

The saddest cries which reach our ears
Are pagan cries from across the seas,
A call for student volunteers
To teach them God and a life of ease;
A call for you, and a call for me,
A call for all at M. C. V.

But the greatest call we'll ever hear
Is the pleading call of God above,
Who pleads with us to be sincere,
And rightly do each task with love;
A call for you, and a call for me,
A call for all at M. C. V.

Junior Class History

The Class of 1925 is perhaps the most heterogeneous and diversified aggregation one could expect to find herded together in one flock, reminding one sometimes of Fifth Avenue, sometimes of the East Side, sometimes of a drunken brawl, and sometimes of a funeral. These pilgrims have come from far and wide—from New York, Jerusalem, West Virginia, North Carolina, Petersburg, Moscow, and all points east.

Dr. Nelson has inspected, palpated, percussed, and auscultated the class, but has not reached a diagnosis yet, or if he has, he has been gentleman enough not to express himself on the subject. His findings are about as follows: Colors: Red, White, Blue, and Brown. Age: From a morula mass to puberty and semility. Sex: Pseudo-hermaphroditic—five per cent dominant feminine characteristics, ten per cent hybrids, and eighty-five per cent dominant male characteristics, according to Mr. A. Straus' modification of the Mendelian law. Occupation: "Extraordinary relative" students.

On inspection the general appearance is innocent, harmless, undernourished, and "adipose," and covered with "stra-ti-fied squa-mous epi-the-li-um." Cranial vault shows some evidences of a Meningocele filled with a purulent exudate. "Anterior fontanelle "patulous." Hair, especially thin on Beau Ahouse's head. Rolling Glad Eyes with ptosis. Grinnin' mouth with Harrassed expression. Stein-Neck with Woody degeneration. "Emphysematus" chest with Camel protuberances. Hacking cough and Bucking rales, after expiration. There are evidences of a stab wound over the precordium, with a most probable Brown atrophy and Jeanetteration of the heart below. Abdomen shaped like wine-stand, and it has a Rolling Hill palpable in the lower right quadrant. On Plunk-ing the abdomen, Carrol was elicted, with Hodges bound to it by adhesions. Extremities of variable length. Von Treppes' sign exaggerated upon tickling the feet. The remainder of the examination is incomplete.

"The speaker feels," to use the words of our good friend and teacher, Dr. Roshier Miller, that the records of the Junior Class would be incomplete without speaking of those leaders whom, like Ulysses the Sagacious, hero of the Trojan war, so shrewdly led his men to conquer, and showed them all the tricks of his trade.

With much pleasure do we recall the scholarly, precise lectures of Dr. Michaux. We have learned from Dr. Whitfield how to protect our rights and collect our fees; from Dr. Williams how to catch the Quadrinaculareis and Aeses Fatigans; from Dr. Hudson, to ask the school children if they brush their teeth once a day, and how easy it is to get the truth from at least fifty per cent of them; from Dr. La Roque we have learned the use of water, and have become more accustomed to its use externally, perhaps, as shown by the Saturday attendance at the "Y." We believe he is the only human being that can successfully smoke, turn a handspring, and deliver a good lecture simultaneously. Dr. Tompkins has told us many a prodrome and syndrome, and they...
have all been found very interesting. Dr. Vander Hoof has so interested the class with the study of the heart that we went to his classes with all the enthusiasm of a high-school girl lining up for the matinee at the Lyric. Dr. Baughman told the dramatic tale of the race of the spermatozoa until we thought that we were beholding the chariot race in "Ben Hur." Dr. Grinnan related to us the one and only fountain of youth, for he has explained how years can be added to our lives by embition of the lactic exudate of the goat, provided the proper technique is used. Whenever we encounter Skoda's resonance we must think of Dr. Higgins, and to the members of this class it will always be the Higgins resonance.

We have recently been introduced to Drs. Willis, Mauck, and Coleman, who have told us of the surgery of the abdomen, frame, and brain—if there is any. If things continue as they have started we are going to catch H——, but we think that we will bountifully reap any extra effort that we may sow.

But let us not dwell too long upon the achievements of the past—of how we gained the elevated position of Juniors at the Medical College of Virginia, but—

"Push off, and sitting well in order, sought the
Bounding furrows, for our purpose holds the sail
Beyond the sunset and the baths of all the western
Stars until we die."
A Summary

Four long and weary years ago, without a grief or care,  
We came to good old M. C. V., with hayseed in our hair;  
Said hair was long and tangled, and hung down around our ears,  
A thick and most luxuriant growth of many, many years.

The sex, of those who had sex, were both held up by a string,  
We had never heard of garters or of any such a thing;  
Our ties were stuck on collars that displayed a lot of throat,  
And an Adam's apple stuck out like the prow upon a boat.

But we registered, and after that, of course, could not turn back,  
And all were somewhat reassured by the genial smile of Mac;  
We bought our books, and went to work—O, what a weary time  
That four years was to all of us, a long, heart-breaking climb.

The first few weeks were awful, and a bad nightmare until  
We started in to learn a little bit with "Bob" and "Bill"  
Or under Doctor Hoskins (she who came and went too quick).  
We traced the slow development of child, or pig, or chick.

But during that first year we learned, and most of us learned well  
To dance a little, roll the bones, shoot pool (I shouldn't tell,  
But you won't mind, or if you do, you shouldn't, I don't think)  
To play a little poker, and to take a little drink.

We came back for the second year, a whole lot like the first,  
But if you ask me, of all four years the second is the worst,  
For between good Charlie's quizzing, and the whip of E. C. L.,  
In the language of the prophet, that old second year is hell.

And then the third year came along, but knowing what we knew,  
It wasn't quite as difficult as those first dreadful two;  
For Higgins we spoke Osler, as said Osler should be "spoke,"  
We crammed for Doctor Vander Hoof; we plugged for Paul La Roque.

We did our stuff for Williams, Tucker, Coleman, and the rest,  
'Twould be hard for us to pick out now the man we liked the best,  
For Whitfield, Nelson—all of them—were with us all the time,  
To boost us when we faltered, or grew weary in our climb.

The fourth year followed after, and is over, and we're through,  
And going out to do the things they taught us how to do;  
If we follow in the steps of those who taught us, we are glad,  
For if we're half as good as them, we can't be very bad.

Sophomore Medical Class History

As the hues of autumn began faintly to tint the landscape, we straying Freshmen returned from various states as full-fledged Sophomores. A few of our original members were missing—some had left us for other schools, others had given up the struggle entirely, but in spite of our losses there were sixty-five of us ready and intent to "carry on" for another year. The one member of the fairer sex also returned.

First of all we entered the old college building. Impressed with its history, we ascended the many flights of stairs to the top floor. There we sat, discussing the many happy days of the months just past—when the door opened and in walked the man of whom we had heard so much, Doctor Haskell. There was a silent moment in which we surveyed our new professor, and formed our first impressions of him.

After taking our names in alphabetical order, and telling us briefly what we would need to begin work, he dismissed us. We immediately formed our groups of six and looked the physiology "lab" over minutely, meditating upon the many hours, happy and dreary, we were to spend in that place.

Next we turned to bacteriology, and again met Doctor Miller, with whom we were already well acquainted. Then we met Doctor Brodnax (better known to us as Dr. Brody). And Doctor Cook completed our list of "profs" for the first semester.

Rather peacefully and tranquilly we pursued our careers until the long-looked-for and long-planned-for Christmas holidays, when we left the college behind for a merry Christmas with our families. As a class we had not forgotten the significance of Christmas nor the spirit of giving, and before leaving we presented a token of our esteem to Dr. "Billy" Christian, the guide of our first days at M. C. V.

Vacation over, most of us were back on time (though there were a few stragglers) all keyed up, finishing our "lab" work, preparing for exams and "the practical." By the last of January most of us had swum through to the second semester, though a few were left still trying to learn to swim.

The days of the second semester did not pass as peacefully nor as tranquilly as those of the months before. Day after day new problems presented themselves, but we successfully solved them. Thus the days sped by, filled with pharmacology and pathology, spiced with clinical diagnosis and physical diagnosis. The grand and glorious day arrived when we could carry a stethoscope, and this we did, giving said stethoscope a prominent place upon our persons so that the passer-by might be certain we were medical students.

Once more the time comes for us to disband for a season. Once more we bid our "fellow-sufferers" a fond adieu, and may it be that once more we will reassemble, ready to take upon us the duties of Juniors. May we be protected by "The Shadow of the Wing" while we are absent.
A Retrospect

Among the beautiful pictures
That hang in the back of my dome,
To the day of my graduation,
From the day that I first left home,
Regardless of time or season,
Spring, Summer, or Autumn, or Fall,
The days spent in Charlie's "lab" class,
Now seemeth the best of all.

Not that I found it easy,
To study day after day,
And follow the wild, weird tracings,
On the drums, as cats passed away;
Or to locate the small carotid
In the neck of a shaggy dog,
For sometimes my brains were hidden
In the clouds of a blinding fog.

Not that I loved the turtles,
That slept in the rusty tub,
The frogs, or the cats, or rabbits,
Or the pigs that I used to rub;
Not that I always answered
The questions he threw at me,
For at such times I felt much smaller
Than a germ on the back of a flea.

But whenever I think of the courses,
In the shade of that vine-clad wall,
I forget everything unpleasant,
And my memories alone recall
The picture I keep of Charlie,
Leaning back in his tilted chair,
His smile, and his book, and his pencil,
His eyes, and his graying hair.

That picture, each day, grows brighter
To me as the long years pass,
And not only to me, but to everyone,
That ever took Charlie's class;
And I know it will live forever,
Till I've finished my life's long span,
For whoever knew Charlie Haskell,
Knew the best of God's works—a Man.

“Special Medical”

Berry, W. R.
Freshman Medical Class History

I but know a year ago the things that I know now, I think I would have stayed at home as chauffeur to a cow; way back where all I had to know about my fellow-man was how he looked outside and not the whole blamed dog-gone plan.

But now I know each man to go must have two hundred bones—
to think of that much being inside good old Deacon Jones! And that besides, on his insides, are lots of other things the deacon never heard about—but such Friend Knowledge brings. And that each time the dean eats an apple it's a fact that it changes to a million things in his alimentary tract.

And that the deacon grew (now please don't laugh at me, I beg) just like a hen or rooster from a single little egg! And if I should tell the deacon what I know about his heart, I know he would, to prove it, try to tear himself apart.

But here we are, the first year done—although not without pain, a specialist on everything from ankles up to brain. And next September we'll come back, with all these things in store, all ready to go back to work, each a stately Sophomore. And we'll look back on our Freshmen days as something to remember, and talk about in days to come—good-bye till next September.
THE FIRST YEAR

Page ninety-three
Germified Politics

One day when the sky was as blue as could be,
And not one breath of wind stirred a leaf on a tree,
A convention was held down on Seventeenth Street,
The chairman of which was a bold Spirochete.

The convention was held on that warm summer day
To protest against men who, at Twelfth Street and Clay,
Were murdering germs by the millions and tons,
And leaving them widows, or fatherless sons.

Said the chairman, "I once led a nice quiet life
In the blood of a coal-heaver's nice big fat wife,
And was raising a family who one day would be
Worthy sons of a father as happy as me.

"But one day, after hanging the wash in the yard,
She went down, paid a quarter, and got a red card.
A "doc" plucked her muscles, like strings on a harp,
Took some blood, which he sent in to William F. Sharpe.

"Doctor Sharpe did a Wasserman test, and he found
A lot of my grandchildren, floating around,
And since then I have been in a terrible fix,
For I'm sprayed every week with that green Six-O-Six.

"And Sharpe is the man we have reason to fear,
For day after day, also year after year,
He is robbing us all of the homes we love best—
Germs will soon be as scarce as the sleeves on a vest,"

Then a T. B. Bacillus, with tear-filled eyes, said,
"I learned just today that my mother was dead,
Doctor Sharpe got some sputum, and found her in that,
And killed her as quick as a cat kills a rat."

Then all of the rest, with most sorrowful wails,
Started telling each other most sorrowful tales,
And they all cursed the man who was finding them out,
And showing the "docs" how to put them to rout.

But regardless of this, Doctor Sharpe, every day,
Gets better and better in every way,
And I pity the germs that get under his eye—
Once they get in his "lab" room they sicken and die.

LINDON OUTTEN ALEXANDER  
PORTSMOUTH, VIRGINIA  
Φ Ω

Secretary and Treasurer Class 1922-23; President Tidewater Club, 1922-23; F. L. E. Dental Society.

"Fats," a gentle and noble boy, enshrined in the hearts of his fellow students.

During his first year here he gained the reputation of liking a young lady named Omar, but since he has proven himself such a good student we are inclined to think he was more interested in Omar Khayyam or some other classic.

Though his hair is tinged with gray, "Fats" is the youngest member of the class, and by far the most studious. Given a duty to perform, you may regard it as accomplished. His example as a student and as a man is well worth following. He is true to himself, and it follows that he is never false to any man. The family escutcheon will never be tarnished by this, the only child, but his high honor and self-respect will add luster to it.

A debater of no mean ability, "Fats" could take the unpopular side of any argument and so present his side of the question as to win overwhelming sentiment for his as the best paper.

May all good luck attend him in the future, and may he enjoy life and all its attributes in the "City by the Sea."

W. E. ARMSTRONG  
M'DOWELL, VIRGINIA  
Ξ Φ Φ

Treasurer, Class 1922, Dental Society; Tidewater Club; Class Representative, "Skull and Bones"; "Skull and Bones" Staff.

Armstrong, better known as "Hoot," or "Hoot Gibson, the Kactus Kid," hails from the vicinity of McDowell, Va. He is a man whom we love, not only for his willingness to lend a helping hand in time of trouble, but also for his ever-present bright smile.

"Hoot" has found time to do everything twice since he entered college, and has satisfied his curiosity in many ways by his own experiments. He is constantly thinking of Dentistry, and studying out possibilities that he will make use of when he gets out into the practice of his profession.

Armstrong (like his name upon the roll) stands among the first of our class in many, many ways, and there are wonderful opportunities awaiting him. We expect to hear of him often after he leaves college. In the midst of his studies and experiments he has found time to pay his fondest attentions to the fair sex, and we think he has achieved success in that line also, although he honestly claims Dentistry as his only love.

Go to it, "Hoot," you have, without a doubt, chosen the right profession, and success certainly awaits you in the near future.

Page one hundred five
Senior Dental Class

EDWIN JACOB BINDER
NEWPORT NEWS, VIRGINIA

Tidewater Club; Dental Society; Masonic Club; F. L. E.

Binder came to us four years ago from that wonderful city of Newport News. Since that memorable date he has endeared himself to all his classmates, who have found in him a rare combination of good fellowship, indifference, and common sense. Multiplying these by his ability to sleep through the morning classes, we have a perfect specimen of an M. C. V. Dental Student.

Someone has said that this good-looking man was dignified. Had our attention not been called to the fact, we would have failed to notice it, for he is one whom we have always found full of merriment, and always ready for any joke. With all his readiness to enter into any fun, Binder has that wonderful quality of mixing pleasure and business in such proportions as to make life worth living; yes, and with a "Read-Headed Gal" on his mind, too.

Long before he met the "Wonderful One" Eddie told for the fair sex, even as his name indicates,—"Each Darling Dame Incites Eddie." But with Cupid to turn the trick, Binder has become a changed man—hence the reason for our class being repeatedly entertained with "solos" of a melody long forgotten by everyone except him—"That Read-Headed Gal."

But withal he has been industrious; when we think of him our expectations are great, and we will not be disappointed.

WILLIAM NATHANIEL BRASHEARS
WASHINGTON, D. C.

Φ Ω

Behold a man! "Bill" is unassuming, humble, and enthusiastic. He hails from the Capital City, and has cheerful, glowing greeting for all who come across his path. He is fond of good, health-producing sports, and has taken a keen interest in all "Y" athletic activities.

He is not so tall and not so fat, but "hits the ball on the nose when he comes to bat"—every time. And his omnipresent motto is, "Smile awhile and then awhile another smile, and soon there's miles and miles of smiles, and life's worth while because you smile."

Bill is a tennis enthusiast, but has a hard time getting opponents, for he likes nothing better than to get out and play a game just at dawn—and whoever heard of another student having any time to spare at that time of day?

In the years to come, as we glance backward, we will recall "Bill" striving in his tireless way, surmounting obstacles one by one, and we are confident that his unfailing energy will lead him to the goal of his ambitions.
Senior Dental Class

ANDREW EDMUND BREWER
RICHMOND, VIRGINIA
Σ Φ Ε

Randolph-Macon Club; Dental Society; William and Mary Club; Ex-Service Men’s Club.

Brewer came to us in the fall of 1922, after completing his first two years in Dentistry at Tulane University. Some time before that he had entered Randolph-Macon College to study the ministry, but the World War came along, and before he had completed that course he answered the call to the colors, and readily responded by enlisting in the marines. After his discharge from the service, in the winter of 1919, he decided to change his vocation, and in the fall of 1920 began the study of Dentistry at Tulane.

During his two years with us Brewer has proven a conscientious student and a trust-worthy friend, and has gained the admiration and respect of all his classmates by the sterling qualities he has displayed both in and out of school.

With the unfolding of future years, which are to change the happenings of today into the memories of tomorrow, may he achieve what he justly deserves—success.

EARLE H. BROWN
BARBAMSVILLE, VIRGINIA
Σ Φ Ε

German Club; Dental Society; Randolph-Macon Club; Tidewater Club; Class Basketball Team; Baseball Team, 1917-18.

“Pitcher,” “Eel,” or “Sandy,” whichever you choose to call him, is the real terpsichorean “sheik” of the Medical College. He is promoter and controller of all indoor sports, both masculine and feminine in character, and commander-in-chief of the “Army of Dead Soldiers,” while living.

You’ll very likely say he must have come from some great metropolis, but alas, you are wrong, for this is one case where “the boy came from the country, and the country left the boy.” And more than one heart will be broken when he leaves Richmond.

Brown has never been a “dill-picker,” but still, in spite of his many social duties and activities, he has convinced all the “profs,” especially Dr. Holliday, that he is one of the best and one of the hardest working students in the class.

“Sandy” has always held his own in all respects, and we are certain that when he goes to Florida, as he says he will, he will show the old South just what Richmond can do in the production of good dentists.

We deem it useless to wish him success, for it is inevitable. Good luck to you, “Pitcher.”
Senior Dental Class

JOSEPH OTIS BROUGHTON
Zuelon, North Carolina
Σ Φ Ω

Vice-President Wake Forest Club, 1922-23; North Carolina Club; Dental Society; P. L. E.

Broughton, another Tarheel, came to the Medical College after two years at Wake Forest. We have ever known him to be quiet, unassuming, but thorough in all his undertakings. When he speaks—which is seldom—his words are always to the point and well worth hearing. He believes "there is a gilt beyond the reach of art, of being eloquently silent."

He has proven himself a great favorite among the ladies. In fact, though he claims Wake Forest as his Alma Mater, we have often feared that he would become a Westhampton Spider.

In his work he has always stood high, and his record is one of which he is justly proud—what more need be said? His college career speaks for itself, and further praise is unnecessary.

As student days draw to a close, and our paths in life lead us into widely different directions, our parting wish is that the success which has crowned his college days may continue, as we have no doubt it will, in the years that are to come.

THOMAS WOOD CAMPBELL
Suffolk, Virginia
Φ Κ Σ, Φ Ω

Randolph-Macon College; Reporter, "Skull and Bones"; P. L. E.; Dental Society; Randolph-Macon Club; German Club; Inter-Fraternity Council, 1921-22.

"T. Wood" is a refined gentleman, with a finely endowed mind, who is not fearful to give expression to what he inwardly feels. He believes in the virtue of truth, and is uncompromising in his stand for fair play. His dauntless courage in the just prosecution of any question that has to deal with either individual or class has won for him an enviable place in the school. The dean says "Dr. Wood Campbell will present his argument for the affirmative," and in flowery language and with forceful logic he advances his arguments in a convincing manner.

Campbell loves a good time, but the seriousness with which he goes after his work dispels any idea that he loafs in college. He is a young Southerner of the old school, who believes in every fiber of his being that the Old South, in her patriotism, her love of home, her ideals, her joys of living, and her passion for beauty, stood for things that are eternal.

He is bound to enjoy success in his chosen field.
Dental

William Russell Colvin
Culpepper, Virginia

JAMES FRANK DUKE
Pantego, North Carolina

Senior Dental Class

Colvin is a genial good fellow and a hard worker. Persistence and determination are the two things that mark his character. The boys started to "rag" Colvin, but he began sending back far more than he received, and they desisted.

There is a mystery in Colvin's life which we have never been able to solve, and we are inclined to believe that there is a girl somewhere. Not only has he refused to smoke or take a drink, but he can also boast of the fact that he has not had a date with a girl in Richmond during his four years in college. He is always to be found at any of the M. C. V. basketball games, keeping time or score, or passing out gum to the players. He has been one of the best "boosters" for basketball we have ever had in college.

A man of Colvin's persistence and determination is destined to make good in the field of dentistry, and we wish him well in all his undertakings.

Frank, having finished the Pantego High School, decided to look for new worlds of knowledge to conquer, and in accordance with this idea, he came to M. C. V. to raise the number of "Down Homers."

We are glad, indeed, that Frank made this decision, for beyond a doubt he was intended for the profession of dentistry. He seems abundantly blessed with the ability to please patients; we often wonder if this is due to his high class work, or to the beautiful curly locks, which are not the least of his attractions. Certainly the afore-mentioned locks come in for a lot of attention when the ladies begin to sing his praises, as they are continually doing.

Frank has won for himself a wide circle of friends by his upright manner of living and strict attention to duty, and we feel sure that the same admirable qualities which have manifested themselves throughout his college career will pave the road to success over which he is sure to travel. We will surely miss him, but realize that our loss is the world's gain. And it is our desire that he may have a long and useful life in the profession.
Senior Dental Class

George Washington Duncan  
Fayetteville, West Virginia

President Sophomore Class; Dental Society; West Virginia Club; Y. M. C. A. Secretary, 1922-23; "X-Ray" Staff, 1923; Editor "Skull and Bones," 1923-24; Chess Basketball Team.

George, a gentleman of honor, high ideals, and morals, is very popular amongst the students of M. C. V., and especially so with his classmates. He has refused equally as many offices as he has accepted. As a technician and scholar, he has always been about the best in our class, and as editor of the "Skull and Bones," he is due a great deal of praise for the type of paper which he has put out weekly. Regardless of his many duties, he has found time to take part in athletics and to give at least two nights a week to one of the "fair sex." He could be a "sheik" if he felt so inclined, but has seen fit to confine his attentions to only one.

Because of his ability and judgment, we expect great things of George. If a man is known by his works, he will soon be known to all dentistry, and West Virginia should be proud of his decision to return home. Yet, we hardly see how he can leave "Virginia."

Robert Allen Foster  
Norfolk, Virginia

Dental Society; V. F. L. Club; German Club; Secretary and Treasurer, V. F. L. Club.

Here's to "Walter Kirsh," the man from the sea shore. He is very fat and fastidious, and speaks only when forced to by "corn" or otherwise. He is great for eating oysters and clams, and often runs out at night to get a poultry sandwich.

If a gun, boat, or automobile is mentioned, he can tell you more about it than Doctor Black can tell about cavity preparation. We have often heard of bringing in a ship. Well, for the last four years Bob's father has been bringing in ships for him.

He is one of the most popular boys in the class, true and sincere in his friendships, and we wish him a big motor boat and more practice than he will ever be able to look after.

"Walter Kirsh is a cake of pity;  
He doesn't eat at Richmond Inn,  
But dines at the Capital City."
It is with no little pleasure that we present the gentleman named above. He came to us in the year 1920, and was soon known to everyone as a good all-round student, a faithful friend, and a man of strong character.

"Buck" walked through the prescribed course at M. C. V. with much ease and splendor, and in his Junior year was the first to complete the required number of points. And we want to thank his people for sending us such a wealthy man—a man we all feel proud of.

Old M. C. V. will not seem the same without "Buck." We will miss him, but will find solace in the knowledge that he is a man with a purpose, positive in his actions, and true to his ideals. We predict for him the greatest possible success, and we feel sure that he will ever remain a true son of his Alma Mater, to which he is bound to bring honor and fame.
Rude left the sunny shores of the enchanted isle of Porto Rico in the fall of 1920, and seldom have we met one person who possessed so many varied attractive characteristics. Entirely independent of the actions of others, and firm in what he believes to be right, he stands out as one of the most promising young men in college.

His specialty, aside from educational pursuits, is "heart-smashing." Richmond has not contained material enough to supply his conquests in this line—unless we consider the corporate limits to extend well beyond Colonial Avenue.

When our college days become things of the past, and we look back at them, we realize that our greatest amount of pleasure came from our associations with true friends, and of these "Goldie" was one.
Senior Dental Class

GAITHER FRED HALE
RALEIGH, NORTH CAROLINA
ΣΨΦ

Secretary, Freshman Class; Treasurer, Dental Society; Y. M. C. A. Cabinet, 1921-22; President Junior Dental Class; Advertising Manager, "X-Ray," 1922-23; North Carolina Club; Ex-Service Men's Club; Square and Compass Club; F. L. E.

Never has the "Old North State" produced a truer, more loyal or devoted son than Hale, and, as will be seen from his list of honors, he has left the impression of his magnetic personality upon this school.

A consistent worker, a true friend, always cheerful, and ever capable, throughout his whole time with us he has held a place in the front ranks of those who can be relied upon whenever there was anything to be done through which his school or his class might benefit.

His sterling and gentlemanly character have won for him a host of friends, and he has the honor, love, and respect of them all. For such a man, the future can hold nothing less than glorious success.

We regret the turn of fate which causes the parting of the ways, and in his journey through life, may he find only the roses and miss the thorns, and may his career be long and prosperous.

ORIEN RUSSELL HODGIN
STONEVILLE, NORTH CAROLINA
ΨΩ

Trinity College; Historian, Junior Class, 1922-23; Masonic Club; F. L. E.; Dental Society; President Overseas Club; North Carolina Club.

In Hodgin we find the oddest mixture known to science—a mass of energy, a bundle of nerves, a passion for work, and a love for women. However, superimposed on all this, he has carried the thought and the determination to become a good dentist. And we know he has succeeded.

Hodgin interrupted his educational career long enough to do his bit in the World War and served in France under the Stars and Stripes for two years. Returning to America, he decided to study dentistry, and we are glad he did, for he has made one of the best men, not only in his class, but in the entire school.

He seems to possess an infinite capacity for work and a never-ending amount of energy—tackles everything and never lets up until he has completed his task. He will probably settle in the Old Dominion to practice—yes, there's a reason. But wherever he settles, whether in Virginia or in the Old North State, we can only wish that happiness and success will crown every effort.
Senior Dental Class

EDGAR PEDIGO HOWARD
ROANOKE, VIRGINIA

Basketball Squad, 1920-21; Randolph-Macon Club; Dental Society; Y. M. C. A. Cabinet, 1922-23; Manager Basketball Team, 1923-24.

"Mummy" came to us from Randolph-Macon College, where he earned an enviable record as a student and athlete, which record he has sustained throughout his four years here. He has spent a great deal of time on his books, but has also found time to take an active part in almost every phase of college life, and his friends are found not only in his immediate class, but in other classes as well.

Due to his activities in basketball, he is sometimes known as "Drawback," but after watching him work anyone must realize that this is a misnomer, for no one on the team does more to "bring home the bacon" for old M. C. V. than "Mummy."

Aside from his school activities, it is a well-known fact that he keeps the rails hot between Richmond and Staunton. We are not sure, but we fear there is a lady in the case.

His ready smile and warm handshake have won him many friends, while his engaging personality and keen judgment will be valuable assets in the pursuit of his chosen profession.

JAMES FRANKLIN HUNT, JR.
JEFFS, VIRGINIA

Randolph-Macon Club; Tidewater Club; Dental Society; F. L. E.

"Frank" both in name and disposition, the gentleman named above came to us in the fall of 1920. He brought with him all the qualities which go to make success—optimism, science, determination, a big heart, and practical knowledge, and all these qualities have evidenced themselves continually during his four years with us.

Though not noted as a ladies' man, he is noted as a baseball fan, and is often seen occupying the bleachers behind third base. If you want to know any batting averages, from Babe Ruth's down to the humblest batter in the Texas League, ask "Frank."

Hunt is truly devoted to his profession. No matter how trying or tedious the work, as long as it pertains to Dental Science he exerts himself to the utmost, putting his best into it. The thoroughness and exactness with which he works mark him as a man fitted for scientific research, and it can be confidently predicted that he will make a place for himself in future Dental History.
Senior Dental Class

GEORGE ALVAN CHAPMAN JENNINGS
Toano, Virginia
Σ Φ Ε, Σ Ψ Φ
Vice-President Student Body, 1924; F. L. E.; President German Club; Vice-President Dental Society; President William and Mary Club; Member Inter-Fraternity Council; Associate Editor, “X-Ray”; Cheer Leader; Ex-Service Men’s Club; Glee Club.

“Skeeter” is a man whom everyone knows, and of whom it can fittingly be said, “We knew him but to love him; we named him but to praise”; the type of man you would pick for your pal or buddy; a friend you could trust to the limit. Whether “bow-legs” have any bearing on popularity or not, we cannot say, though in this case, it seems that there must be some connection. However, “Skeeter’s” popularity may be due to his hair, the color of which has never been definitely determined.

You might imagine that this good-looking man is a veritable Lothario, but no—not quite. Although he rates quite well with the fair sex, such a distinction would not be fitting, and from the evidence at hand it does not appear that there is anyone at home waiting. Therefore, we can truly say that he has only one love—his profession—and we do not doubt in the least that his genial nature and cheerful personality will win him the same amount of fame in his practice that they have here at M. C. V.

FERNANDO ORDONÉZ
Fajardo, Porto Rico
Ψ Ω
A.B.

Ordonez is serious-minded and meditative, man, a traveler, and a versatile conversationalist; a hard-working chap who can justly claim recognition and praise for his meritorious endeavor and accomplishments.

Born in San Juan, Porto Rico, he migrated to Spain and won for himself the degree of A.B. at the Central University of Madrid. Fourteen years in that country having fitted him with ample ideas of the Old World, his progressive nature was eager for Knowledge of the New, so he cast his lot with us, and we have been mighty glad to have him.

Not content with sailing the high seas, he embarked on the sea of connubial bliss, and is the only Benedict in our class—at any rate, the only one who openly admits it.

Ordonez is serious-minded and meditative, and it is our belief that this steadfastness of purpose will win him a place among those to whom our Alma Mater can point with pride.
Senior Dental Class

Yale Passamaneck
Richmond, Virginia

Yale, better known as “Passy,” is, on appearance, a serious and conscientious fellow, but now and then his fun-loving propensities break through the taciturn exterior, and we know him for what he is—a jolly good fellow, ready to do anything or go anywhere on a moment’s notice. He has a fatal weakness for women, and we fear that some vampire will capture his scalp and heart long before he intends it to happen. It can’t be helped—it’s that attractive blush that get ‘em, and, what’s worse, holds ‘em. They love to see him blush, and he does it nobly.

Yale’s favorite pastime is reading, and if he carries this habit on into later life, we know it will prove an asset to him in keeping up with new discoveries in his profession, and that he will make an ideal, scientific dentist. Another useful habit he has cultivated while in college is to go out occasionally and ring down a few “berries”; hence, he isn’t the borrowing type, in which he differs from some others in his class.

With his ability, manner, and personality, he cannot be other than successful, and we wish him the best of luck.

John Gary Potts
Lynchburg, Virginia

President Senior Class: German Club; Dental Society; Randolph-Macon Club; President Interfraternity Council, 1922-23; Piedmont Club.

“Johnnie,” otherwise known as “Polly Prim,” hails from the hill city of Lynchburg. He is about the smallest member of our class, but has made no small number of friends during his sojourn at M. C. V. He has the honor of being president of our noble class—that’s how much we think of him.

“Polly Prim” makes no denial of his liking for the ladies, and he has been a ladies’ man during his entire time here. In fact, we do not think he will have placed many amalgams after graduation before he gets serious matrimonial intentions. It’s a good thing for John that he has a parson in his family.

His hobby is picking dills at night, and he claims to rank among the best dill-pickers in his class. We know that in later life he will attain every success, and we wish him luck in all his undertakings.

Page one hundred sixteen
Senior Dental Class

JAMES LEO PURCELL
WASHINGTON, D. C.
ΞΨΦ
Wharton School; Georgetown University Dental Society.

To know "Jim" is to like him, for he has that enviable type of personality which makes friends, and keeps them. He came to us in his Senior year from the nation's capital, and it may well be said that it was never necessary for him to come further south than Washington to improve his spirit of Southern hospitality. We would not mind being bald, too, if we could carry our heads with the dignity which he possesses. Although it is a scientific fact that hair and brains have neither a direct nor an inverse relationship, we sometimes wonder why he has seen fit to supply the deficiency in one place with a luxurious growth in another—note the upper lip.

"Jim" is a fellow of high ethical standards, and one who bears the grand old name of "gentleman" without reproach—what more can we say? We wish him well, and know that success will crown his future efforts.

ALVAN DREW RAMSEY
NORFOLK, VIRGINIA
ΞΨΦ, ΞΦΕ
Dental Society; William and Mary Club; V. F. L. Club; Tidewater Club; Richmond University Club; F. L. E.

In glancing over our hardships and shortcomings of the past four years, it gives us great pleasure always to remember the cheerful smile and sincere encouragement of "Ramsey" which so often has helped us to forget the unfortunate and disagreeable experiences which must fall to the lot of every dental student. His motto, acted rather than spoken, is "Do your best, and don't worry about the rest." His class feels highly honored in having been associated with him, one who has ever been a perfect gentleman as well as a good student.

Underneath his seriousness there has ever been a keen sense of humor. Ramsey has been one of the best liked men in class, and has often proven himself to be a thoughtful and sincere friend. We hate to lose him, but our loss is the profession's gain.
Senior Dental Class

Jerrell Rogers Reams
Mosley, Virginia

Dental Society; Member Honor Council, 1921-22.

After doing pre-dental work at Valparaiso University, and doing his bit in the navy for Uncle Sam, Jerrell came to us in the fall of 1920. Rather older than some of us, and better known as "Uncle Reamus," Jerrell has proven himself to be a real sport. He has been one of the hardest-working boys in the class, always putting business before pleasure, and always conscientious in his work.

He hails from the hills of Powhatan, and whether he returns to that part of the world or goes to some other section, we are certain that he will be an asset to any community in which he locates. A man of his high ideals and sterling qualities is bound to rise to great heights, and we bid him God-speed, with every confidence that he will, in the future, attain great success.

Clement Jay Robbins, Jr.
Hampton, Virginia

Φ Ω

Vice-President, Junior Class; German Club; E. L. E. Dental Society; Tidewater Club; University of Virginia, 1918-19.

The good Lord made only one Jay Robbins, and then destroyed the patent. When Jay entered M. C. V., four long years ago, fresh from the university, the flush of youth was still upon his cheeks, and he loved an occasional wild party, even as you and I, but he was destined to meet one who would soon prove a very efficient "tamer," and who has kept him well in hand ever since.

And as for "love"—but here we reveal too much—sufficient to say that he is welcomed seven nights in every week at a certain Richmond fireside, where a soft-eyed maiden waits the coming of her lover.

Jay is a man of ability, and no subject ever held any terrors for him. No one ever saw him angry. His creed has been, "'Tis better not to be, than be unhappy." His bright and sunny disposition, his keen witticisms, his distinctive personality and his interest in his work have endeared him to the hearts of all of us. We wish him success in every walk of life, and a long and useful career.
Senior Dental Class

Harry Ruth
Richmond, Virginia
R. O. T. C.; V. P. I.; 1917-18; V. P. I. Club; Dental Society; F. L. E.

Although he claims no relationship with the famous "swatter," "Babe" is just as big a man in a different way. One of his most reliable qualities is an immense amount of nerve, and to see him walk into class fifteen minutes late (a not at all infrequent occurrence) and calmly remark, "I'm here, doctor," is medicine enough for anyone needing a nerve tonic.

In the infirmary he has been noted for his constant supply of good-looking patients. As to just how he attracts them we are uninformed, unless it be those golden, marcelled locks—or, better still—that passionate upper lip.

We don't know how this blonde Romeo spends his Sunday nights, but we are inclined to believe that his inviting smiles, on that night, have been reserved for one, and one only.

Keep up the good work, "Babe," and we are sure that a life crammed full of success awaits you.

Lewis Raymond Semones
Galox, Virginia
Z Phi

Secretary-Treasurer, Senior Class; Southwest Virginia Club; Dental Society; Masonic Club; German Club.

Hailing from the mountains of the Southwest, where they come hard and tough, "Hick" quickly discarded his mountaineer clothes and blossomed out into the biggest "cake-eater" in our class.

Slow but sure, "Hick" always turns up smiling when the final roll is called on anything. At the present time he is desperately in love with a young school mistress, and (although it did no good before) we all wish him the best of success in coming through smiling here also.

Conscientious, careful, and considerate, Semones is sure to make good wherever he decides to practice.

In his first year, selecting Underwood and Anderson as companions, he organized the "Three Musketeers" and the trio have been inseparable ever since. Find one of them, and the other two were never far away. Neither in the pursuit of his profession nor in the game of love have obstacles ever meant anything to him, and we know that he is going to make one of the shining lights in his future as a dentist.
Senior Dental Class

JOSEPH WHEELER SIMPKINS
HANOVER, VIRGINIA

"Vulcanite" Simpkins came to us from Caroline County—rather indefinite, but "Simp" says "there ain't no towns in Caroline County."

"Simp" is an all-round good student and technician. Aside from this, he has found time to advance several new theories in pros-thetics, chief among which is his theory that central incisors should be placed up-side-down to give a more artistic finish to a denture.

"Vulcanite" had a bridge made by a fellow student this year, but when the bridge was completed he refused to have it put in place, as the space was so convenient to "spit" through, said space being where a first bicuspids should be.

But after all, he is a man whom we feel sure will be an honor to the profession, if only for the unexampled excellence of his research work. Here's wishing him the best of luck, and may all his troubles be little ones.

SAMUEL SNOOWEN SNUFFER
CHRISTIANSBURG, VIRGINIA

Vice-President Sophomore Class, 1922; President Square and Compass; Dental Society; Southwest Virginia Club; V. P. L. Club; Neckley Institute

Samuel originated somewhere in West Virginia. Judging from his name you would think everyone had it—Snuffer.

On first seeing him, and knowing that he was from West Virginia, you would think he was a rough mountaineer, but his unvarying gentleness with the fair sex quickly dispels this illusion. Also, no rough mountaineer could display the skill which is his during operations.

Snuffer embodies all the virtues of a "he-man." His favorite expression, "The best I ever saw," aptly describes his own accomplish-ments. He has been a hard worker, and a better-disposed or better classmate cannot be found. We are proud of him, and he will be an acquisition to the science of dentistry. Few men can boast of the rare ability which he possesses, and we predict for him a most successful career.
A Virginian by birth, a North Carolinian by fate, Herbert came back to his native state for his dental education. We have no doubt that the world possesses other men just as good, but we hardly believe there are any better when it comes to any kind of dental work. He is a great believer in the saying, "If you want a thing well done, do it yourself." He is a man of few words, but when he does speak he makes up for his long terms of silence.

Though small in stature, his charms for the ladies have been felt from the eastern heights of Fairmont to the western pines of Westhampton, and from Ginter Park to the park on Forest Hill. He has dated with the large and the small, the rich and the poor, but always with the beautiful, and has caused a fluttering in the heart of many a loud flapper. Look at his picture, and you will readily see why the ladies fall, and why he is so popular wherever he goes.

There is no need of wishing him luck in his chosen profession, for, if luck is work, he will be a mighty successful man.

---

Senior Dental Class

HERBERT SPEAR
KINSTON, NORTH CAROLINA

Secretary, Class 1921-22; Historian, Class 1923-24; Masonic Club; Dental Society; Shenandoah Valley Club.

A quiet, unassuming fellow, Spitler joined us four years ago, a product of the Shenandoah Valley. He has made many friends, overcome many obstacles, and secured a firm grasp on the fundamentals of dental science.

We are glad to number him among our classmates. Quiet, unobtrusive, and unassuming, he is every inch a gentleman, and one to whom success must come in the natural course of events. He has all the traits of an ideal dentist; all those qualities which encourage and inspire others to trust themselves without hesitation to his care and skill.

We wish him all the success to which he is justly due, and hope that he may practice his profession under the ideal conditions of which he now dreams.
Senior Dental Class

WILLIAMS JENNINGS SYDNOR
MANNEBRO, VIRGINIA

Square and Compass Club; Piedmont Club; Dental Society; German Club; F. L. E.

“Buck” Sydnor, better known to his gang as “Willie Hoppe,” came from the flourishing town of Amelia Courthouse. His meteor-like career through college was marked by a flaming trail composed of some of the fairest members of the fair sex, but a brunette on Park Avenue has finally about headed him off.

He has made many friends, and will continue to make them as long as there is any part of “Old Buck” left. Even his inveterate habit of arguing has only made us envious of the remarkable powers he possesses in that line. And though small in stature, he has won for himself the title “Extraction Kind” in the Central State Hospital.

No man of “Buck’s” character can fail to reach the goal of success, and we all wish him the best that life has to give.

WYTHEVILLE, VIRGINIA

Dental Society; Southwest Virginia Club.

“Tartar” is a victim of heredity; not the oral variety, however, but a specimen of the best constructive material of which Southwest Virginia can boast. Activity and accomplishment mean all they signify when applied to “M. A. T.” Entirely through his own efforts he has overcome many obstacles, and, living up to his motto, “Business First,” has come through smiling on many different difficult and discouraging occasions.

We feel especially fortunate to be able to speak so well of “Salivary.” His work, throughout his entire four years in school, has always been of the highest standard, and if he carries into his profession the same brand of grit and determination which he has displayed since he first took up the study of dentistry, few will ever pass him on the road to success.
Senior Dental Class

Claiborne Willson Thompson
Ashland, Virginia

Manager Inter-Class Basketball, 1922-23; Class Athletic Representative, 1923-24; Dental Society; German Club; University of Richmond Club; Class Basketball.

"Big Tommy" came from Ashland, and his husky build indicates that he will have no trouble in extracting upper third molars.

Holding had two years' experience at the University of Richmond and four years at M. C. V., he has learned how to cross the Highland Park bridge blind-folded, the reason being a fair-headed lady at the other end of the car line.

He is a friend to everybody, always ready to lend a helping hand, and has always been a shining star in athletics, having earned four letters from the University of Richmond and having played football on the Richmond Athletic Club in 1920.

We wish him the same brand of success in the practice of his profession which has been his since he entered school.

Horace Kent Thompson
Jacksonville, North Carolina

Honorary, Freshman Class; Dental Society; F. L. E.; North Carolina Club; University of North Carolina.

All roads lead to Westhampton, and the breath of the midnight air is buoyant. Yes, "Tommy" took a special course there, and seems to have met with great success. But the final result is what counts— give him time.

After hard service in the A. E. F., "Tommy" came back to the states to prepare himself for his life's work. He spent a year at the University of North Carolina, then came to us, and has made a mighty good student. While slow to give voice either for or against a proposition, when once he has made his choice, you may be sure the problem will be pushed unflinchingly with all his vigor. Any task worth doing is worth doing well, and his arguments are always logical and show the result of good training and natural ability.

We believe the profession will be blessed with a good politician as well as a good practitioner, "Tommy" will conscientiously pursue his duties, and the community may count itself fortunate indeed that secures his services.
Senior Dental Class

ALVIN DANENBAUM UNDERWOOD
ROSEBORO, NORTH CAROLINA
Ξ Φ Φ

Oak Ridge Military Institute; Historian, Freshman Dental Class; President Dental Society; Vice-President Senior Class; President North Carolina Club; F. L. E.

Underwood still thinks Church Hill is a place of worship, and who knows but what it is! And, come to think about it, there is rose, a flower; Roseboro, a town, and Rosalee, a girl. Does the sum of the three equal a rolling-pin with a practitioner Underwood?

A little taller than they usually grow down in Eastern North Carolina, he is, nevertheless, an ideal product, as evidenced by the marks he has earned in the countless quizzes to which he has been subjected during his four years here.

Underwood is easily discouraged and easily encouraged. He gets blue quickly when everything does not go all right, but a pat on the back from a friend will dispel the gloom just as quickly as it gathered, and he tackles his problems with renewed faith and vigor.

May the "roses" give him health, success, and happiness, all of which he deserves.

JOHN PAUL WILLIAMS
SALEM, VIRGINIA
Ξ Φ Φ

Roanoke Club; Dental Society; President Southwest Virginia Club, 1922; F. L. E.; Assistant Secretary-Treasurer German Club, 1921; Class Basketball.

"Johnny" is a product of the "City of Peace," and a few days after his entrance here was known to everyone. Although a good student, all his activities have not been confined to the study of dentistry, for he soon became indispensable to the fair sex. We could not call him a "sheik"; he simply can't be bothered with the girls, but this same "I don't care for 'em" quality has seemed to draw them to him.

A good mixer, and a star for three years on our class teams, every member of the class will long remember "Johnny." Along with his other activities, he has given all the necessary time to his school work, and stands out among those who already show their place in the world as successful dentists is assured.
Senior Dental Class

U. R. JOBO
MEDICAL COLLEGE
Ξ Φ Φ; Ψ Ω; Δ Σ Δ; Φ B K; K B Φ

President Emeritus Dental Society; Supreme President "Grab 'Em All Society;"
Accessory Member Honor Council; Laboratory Custodian; Controller Dental
Infirmary.

Ladies and gentlemen, the photograph above was not accidentally omitted, for it is an actual likeness of "Jobo," obtained from an extremely complex reaction, the ingredients of which were obtained from the Senior Dental Class, and are understood only by them.

"Jobo" has been with us only two years, coming from an unknown school, but has used his time well. He is the only man in the class who will, upon graduating, have a complete outfit of dental instruments, said instruments bearing the trade-marks of the different members of the class, by which he can remember each one of us in person.

"Jobo" has gotten credit for the disappearance of all instruments from a No. 3 round bar to a Ritter chair. We hesitate to wish him success in life—it is so unnecessary. He can open up a dental supply house any time, and join the Fords and Rockefellers immediately.
Senior Dental Class History

O multitudinous have been the achievements of the Class of 1924 that, due to the lack of space, it would be impossible to narrate all the events of its history chronologically; then, too, many of the accomplishments are so important that "res ipsa loquitur." Therefore, it is the purpose of this paper to give only a few of the experiences of the class, in order that the readers may appreciate more specifically the greatness of the class, and that our deeds may not be affected by time.

As Seniors, looking back over our field of labor, and realizing that we now must begin again as Freshmen in the great world of facts, that our days of thoughtless school life lie behind us, memories instead of vivid realities, we now contemplate with great pleasure the friends we have made. We hold them in more precious light, realizing that only the depth of true friendship will weather the storms of life and still keep fresh that spark of companionship as it exists today.

In the Fall of 1923 we entered on our fourth and final year as students with the responsibilities clearer than ever before us. We can now begin to appreciate the unselfish devotion to the propagation of scientific dentistry which is so well exemplified by our splendid group of instructors. To these men, who gave their time and efforts for our benefit, we wish to express our feelings of gratitude and appreciation.

As the Summer months of 1924 are drawing near, we begin to realize that the time is almost here when we as classmates will be scattered to the four winds. And we also begin to realize, more than ever before, how dear were our inter-class associations, how great was our respect for the Medical College of Virginia and our college professors, and how lasting were our attachments for our Richmond friends.

Now, classmates, with our hopes high, our faith strong, our enthusiasm boiling, and everything ready for the signal, let each one put forth his mite of help and put our Alma Mater on the map. Every member of the Class of 1924 should set himself a goal. His interest in the Medical College of Virginia should, if possible, be greater in the next four years than it was in
the last four years, and if this is the case, we are bound to grow. Abraham Lincoln said on an occasion, and we, too, can profit by the thought expressed, "I am not bound to win, but I am bound to be true. I am not bound to succeed, but I am bound to live up to the light that I have. I must stand with anyone who stands right; stand with him while he is right, and part with him when he goes wrong."
Physical Diagnosis

The "lab" shelves are glutted with test-tubes,
   Reagents, and acids, and dyes,
And thousands of books have been written
   By men who are worthy and wise;
And we sometimes forget, in our learning,
   Or in testing for sugar or fat,
That to cure, you must first know the patient,
   And—Nelson is teaching us that.

The blood count at times may be helpful,
   And the Wasserman helps—when four-plus,
Or to know the percentage of "polys,"
   Or the pathogen causing the pus;
It may help to know cultures from lesions,
   Will quickly kill rabbit or rat,
But to cure, you must first know the patient,
   And—Nelson is teaching us that.

For the man or the woman that's ailing
   Consult us, of course, to get well,
Not to know what their blood count is running,
   Or the size and the shape of the cell;
They want that which is wrong to be righted,
   Be it typhoid or feet that are flat,
And our duty to them is to do it,
   And—Nelson is teaching us that.

For patients don't read all the text-books,
   And don't know the way to be sick;
If they feel well, the rest doesn't matter,
   And our job is to get them well quick.
Our whole course of study is helpful,
   But keep this truth under your hat,
That to cure, you must first know the patient,
   And—Nelson is teaching us that.

Sophomore Dental Class History

The Class of 1926, twenty-one strong (having lost one member of last year’s class), returned to school in September, 1923, after having spent the Summer vacation in an attempt to recover from the nerve-racking ordeal of meeting and overcoming the many obstacles that confront every Dental Freshman—two kinds of Chemistry, Dental Anatomy, Technical Drawing, Histology, and the practical side of the Freshman course.

With Anatomy and Organic Chemistry behind us, we assured ourselves that ours was to be a light year, but alas—Physiology, Biochemistry, Metallurgy and Bacteriology rose before us like an insurmountable wall, and the eternal grind began anew.

Setting our faces towards our ultimate goal, we began the Sophomore work with right good will, and, as large rocks crumble before steady hammering, so did our obstacles crumble and fly like so much dust before the winds.

But ours was not all a tale of work. Believing in the old adage, "All work and no play makes Jack a dull boy," when time and opportunity presented we played just as hard as we studied.

As the year draws to a close we are completing the first half of our course. Much do we owe to the members of the Faculty, who by their kindly words of advice have spurred us on to greater efforts in accomplishing our purpose.

Instructor in Dispensing Pharmacy

L. C. Bird, Ph.G.
Special Lecturer
WITH THE FACULTY
The X-Ray, 1924

Huh? Mr. Cliff must be an awfully intelligent guy!

They say that titanium tetrachloride is the strongest reducing agent known. Mr. Rudd should really try some of it.

Have you seen Mr. Phipps?

At times, Mr. Crockett seems to be awfully mad but he really isn't.

E. P. Turner
Vice-President

S. L. Gray
Secretary-Treasurer

S. G. Vaught
Honor Council and Athletics

Mrs. T. L. Layman
Historian
The above honors indicate the character of "Jim," but by no means do they complete the domain of his personality. He has a host of friends throughout the school, faculty and students alike being captivated by his genial, dignified nature. "Jim" enriches his profession and honors his associates. Coping masterfully with any problem which presents itself, he bids well to prove a big asset to his community and to his calling. His rich, hearty laugh, and broad, pleasant smile, his ability as a leader and his loyal friendship are rarely found so pleasantly combined. We are glad to have had the opportunity to know him, and he takes with him our heartiest best wishes for the success he so richly deserves.

Men like to know "B. T." As conscientious and true as the day is long, as loyal and honest a friend as one could desire, "B. T." holds a unique place in the hearts of those who know him. His keen sense of humor is delightful, and the class roars to a man at his witty sallies and sharp-edged remarks. We say farewell to trustworthy Allen, and wish him all the luck and success the future can give him.
Senior Pharmacy Class

RICHARD WARREN BARNES
ROANOKE, VIRGINIA

K Ψ, Φ Δ Ω

President Senior Class; Vice-President Junior Class; Southwest Virginia Club; Cotillion Club; Pharmaceutical Association.

"Dick" hails from Roanoke, and came to us via the University of West Virginia. Though noted as a ladies' man, he is a student of rare ability, always prompt in doing the duties assigned to him, strictly business-like, and deeply interested in everything pertaining to Pharmacy.

"Dick" has made a host of friends while in our midst, due to his amiable disposition and wonderful personality, and we feel sure that he will climb to the top round on the ladder of success.

JOHN EDWARD BYRNE
PORTSMOUTH, VIRGINIA

Byrnes is literally burning up with eagerness to learn. Nothing is too difficult for him to tackle. As a reward of diligence, he completed his high school course in three years, and bids fair to stand amongst the foremost in his class when the day of graduation comes.

If silence is golden, Byrnes is a mine, though he does not lack the knack of saying the right thing at the right time. We won't say goodbye to him, for we are hoping to see him again.
“Soporific Bill” received his preliminary training at Trinity Park School and Trinity College. “Bill” is the young man who told Dr. Miller, on a materia medica quiz, that “soporifics were agents that formed soap in the stomach.”

When our class first assembled there were seven “Tarheel” matriculates, but for various reasons all of them have dropped out except “Bill.” Thus he stands alone to uphold the traditions of his native state. And wherever he may go to practice, we are sure he will prove as successful and as helpful to his community as he has to his class.

With a loyal heart, a capable brain, and a happy, likeable personality, “Tom” will bid goodbye to our school, leaving behind him a highly credible and honorable record. He has done his work in a conscientious and responsible manner. He is not only a good pharmacist, but a good fellow as well. He has been popular with his class and with the faculty, who unite in wishing him unmeasured success.

Senior Pharmacy Class

WILLIAM STERLING DOSHER
SOUTHPORt, NORTH CAROLINA
Pharmaceutical Association; North Carolina Club

THOMAS ELLIOTT FULLER
ABINGDON, VIRGINIA
Southwest Virginia Club; Pharmaceutical Association.
Senior Pharmacy Class

M. E. GOLDMAN
PORTSMOUTH, VIRGINIA
V. P. I. Club; Tidewater Club; Pharmaceutical Association.

"Mo" is one who knows the true meaning of "pep," friendship, and loyalty; one who is a loyal friend to every member of the Senior Class; one who is ever ready and willing to help a fellow student in time of need; one who is not a "book hound," but capable of making all his classes, and having a good time on the side; one who has the ambition and the initiative to push his chosen profession to the utmost; one whose ready wit has added no small amount of pleasure to the seriousness of the class room hours.

The Class of 1924 says goodbye to "Mo" with a great deal of regret, and wish for him great success in the years to come.

STANLEY TAYLOR GRAY
GLOUCESTER, VIRGINIA
Z Λ X
Secretary-Treasurer, Senior Class; Pharmaceutical Association.

Stanley, as his record shows, has been one of the most popular boys in our class. He is a happy combination of a leader and good sports, always ready to work for the betterment of the school, and likewise always ready to take his part in any merry-making.

Gray thinks much and well, and has never failed to get the best out of all his classes. When he goes the school loses one of its most versatile students, and Stanley takes with him the good will and best wishes of everyone who knew him.
Here’s old “Die” himself, happy though married, and comprising one-half the married men of the class. “Dean” has received a very liberal education, having attended Trinity and Hampden-Sidney colleges. When the war broke out he was one of the first to answer the call, serving three years, two of which were with the A. E. F. in France.

After “doing his bit” for Uncle Sam, “Dean” decided to make pharmacy his profession, and entered M. C. V., where he has proven to be a good student, a hard worker, and a friend to all. “Dean” never has much to say, but as the old saying goes, “Still water runs deep,” and in this case, the saying is undoubtedly true.

Our best wishes go out with him for a bright future.

Now comes “Fuq,” happy-go-lucky and care-free, always with a smile until someone mentions Chemistry or takes some of his Lab. utensils to keep indefinitely; and then, for the glorious outbreak of anger! But behind his nonchalant disposition there lies a motive of keen determination to accomplish his ambitions.

“Fuq” is a product of Hampden-Sidney. He is a hard worker and well liked by all who know him, and we expect big things of him in the future.
Senior Pharmacy Class

[portrait of Thelma Lugar Layman and Robert Lee Lewis]

Thelma Lugar Layman
Class Historian; Class Prophet; Pharmaceutical Association; Southwest Virginia Club.

"Bill" is our one and only girl—our gracious comrade—and, too, "one of the boys." She is married, and very happy.

"Bill" is a good student, and does especially good work in Pharmacy. Though handicapped by sickness during the school term, she has passed all her work, regardless, and thereby has won the admiration of faculty and class alike.

She will open up a store in her home town, and will reflect honor on her school and on her profession by making it a characteristic success.

Robert Lee Lewis
Chesapeake, Virginia

K Ψ

Honor Council, 1922-23; Pharmaceutical Association; Vice-President Pharmaceutical Association, 1923-24.

"Ted" arrived in our midst one bright morning in September, 1922, as much scared as the rest of us. He soon became acclimated, though, and hard and diligent study has enabled him to be one of the graduates this year.

He is a man of sterling character and supreme ability, and his amiable disposition has won for him the friendship of every member of the class. Success is bound to come to "Ted" in life as it has come to him in school. As he leaves us, all of us know that his high ambitions will be realized. His departure is regretted, and he carries with him the very best wishes of his class for a prosperous future.
Senior Pharmacy Class

DAVID WALTER McGUIRE
NORTH TAZEWELL, VIRGINIA
Z Δ X
Pharmaceutical Association; Southwest Virginia Club; William and Mary Club.

"Mac" is our quiet Virginia mountaineer, with a heart as big as his native environment. His genial good nature and serious attitude towards his work have won for him the silent regard of all the class. A first-class student, still he is not blind to the many attractions the feminine personality has to offer, and we think he observes the girls with a sauvé gravity that becomes him well.

We feel our loss as he leaves us, and we envy the community upon which he will bestow his talent.

HAROLD WILBUR MILLER
WOODSTOCK, VIRGINIA
Z Δ X
Secretary-Treasurer Pharmaceutical Association; V. M. C. A. Cabinet, 1923-24; Cuttance Club; Senior Pharmacy Basketball Team; Pharmaceutical Association.

Harold consistently wins. He wins in his work, and he won in athletics, serving his class as a stellar guard in our cup-winning basketball team. "Ramsay" is our mainstay on quizzes, being a veritable mental reservoir, you might say, from which the teacher may dip pharmacy in all its varied fields. He reflected considerable credit on his class while competing for the coveted Fairchild scholarship. He has bed-rock morals and Gibraltar character, and we wish him well.
Senior Pharmacy Class

JAMES E. MORA
CUBA

Mora came a long ways to study Pharmacy, but, as is usual with men of his type, he got what he came for, and is now ready and competent to go out to the practice of the profession, to preparation for which he has given so much serious time and study. He will always be remembered by the Class of '24.

JAMES ROLAND MYERS
WAYNESBORO, VIRGINIA

K Ψ, A Δ P

President Pharmaceutical Association; Cotillion Club; "Skull and Bones" Staff; University of Virginia Club.

"Chief" Myers will ever remain a pleasant memory in the minds of his classmates. His appreciation of the humorous, and his serious application to his work combine to give him a nature that is thoroughly likeable and respected.

The consistency with which he answers quiz questions has earned the confidence of his teachers and the respect of his classmates.

Roland has genuine affection for our Southern girls, and we hope to see him happily married in the near future. With a well-trained mind, a conscientious love for work, and a loyal and deserving heart, he should come through with flying colors.
Quiet, steady, serious, sure—that's Jim Orr. "Cracker" is exceedingly well liked—men like him always are. He has commanding dignity and becoming modesty, and we know he will have years of success in his chosen profession.

Here is the "jolly rover" of our class, one of the best-known students that has ever attended M. C. V. As a good fellow, he has no peer. As a comedian, he is a "side-buster." No matter where he goes Goode is the general favorite. Perhaps he likes to pick up a fuss a little too much—but if he didn't he wouldn't be Hampton.

So having completed two years of happy, care-free, and perhaps boisterous life with us, we say farewell to the one and only Hampton.
Senior Pharmacy Class

SAMUEL PERLSTEIN
RICHMOND, VIRGINIA
Pharmaceutical Association.

"Sam" is one of our home town boys, and came to us a mere "kid" in "shorts." While at school "Sam" has learned many tricks from his former classmates—among them the art of handling women.

"Sam" is a firm adherer to Emerson's saying, "Hitch your wagon to a star." He is very accommodating, and never hesitates to do a favor, hence he's everyone's friend. His ambition is to be, primarily, a good pharmacist; secondarily, a ladies' man like "Buddy" Schnider; and, lastly, a member of the Zeta Delta Chi.

ABE SCHNIDER
WASHINGTON, D. C.
Pharmaceutical Association; Glee Club; Leader of Glee Club orchestra; Senior Pharmacy Basketball Team.

Abe is noted for his manners, his music—and his mustache. His brain is as logical as "the one-hoss shay." He has the courage of his convictions, and, then, he is right; he's RIGHT! When he's wrong, he wants to know WHY he's wrong.

Abe is a good student, with a winning personality, and a good word for everyone. The class wishes "Buddy" the success he will naturally win.
Senior Pharmacy Class

DAVID BERNARD SCHWETZ
PORTSMOUTH, VIRGINIA

Tidewater Club; Pharmaceutical Association.

The School of Pharmacy graduates this man knowing that his armor of knowledge will reflect beams of credit on old M. C. V. His genial smile and scholastic ability have won for him the respect of classmates and faculty alike, and with his superb confidence and thorough training "Dave" should soon bask in the smiles of success.

D. J. SHEA, JR.

It is with deep regret that the Class of '24 graduates without numbering "Shea" as one of the members. He left school early in the year, but we confidently expect and hope to see him included with the men to be graduated some time in the future.
Senior Pharmacy Class

HUBERT HARRISON SHINER
FRONT ROYAL, VIRGINIA

Varsity Basketball Team, 1924; Y. M. C. A. Cabinet, 1923-24; Senior Pharmacy Basketball Team, 1923; Pharmaceutical Association.

"Skinner" is an industrious, willing student, a good athlete, and has plenty of interest and "get-up" about him.

With years of practical experience, and the splendid record of his work here, he has mastered theory and its applications, "Polly" should grab success by the tail and fly away with it. He is well liked and respected, and one of our best men. Go to it, "Skinner!"

ORLANDO CARTER SNEAD
KENDRIDGE, VIRGINIA

Pharmaceutical Association.

"O. C." has the rare ability of doing things well in a quiet, unassuming manner, which has won for him the respect and confidence of all. He is probably the most earnest and sincere worker we have.

We salute this sphinx-like man, beneath whose calm, unruffled serenity there is the promise of great things.
Senior Pharmacy Class

HOMER SIMPSON STOKES
FRONT ROYAL, VIRGINIA
Pharmaceutical Association.

Serious when necessary, but good natured most of the time. Homer is a thoroughly likeable chap, and a true pharmacist. He constitutes a pure culture medium in which the germ of knowledge should colonize into success and achievement. We use this simile to do honor to this adept bacteriologist. We wish him well.

CLARENCE M. TAYLOR
CASTLEWOOD, VIRGINIA
KΨ

Basketball Team, 1923-24; Senior Pharmacy Basketball Team.

"Soapy" is entirely too honest to deserve such a slick nickname. We can't explain this paradox, but the name fits him, and, unlike soap, it sticks! While working, "Soapy" is solemn as a "settin' hen," but an open, friendly smile usually effulges from his countenance, and the smile has made friends of us all. This man is a stellar center on the basketball team, and it was largely due to his accurate goal-shooting that our class won the cup. He is particularly popular with our lady friends, and is truly "A man among men, and a god amongst women."
Senior Pharmacy Class

EDWARD PURVIS TURNER
Newport News, Virginia
Z Α X

Pharmaceutical Association; Vice-President Pharmaceutical Association, 1922-23; Vice-President Senior Class, 1923-24; Cotillion Club; Tidewater Club.

After graduating with honor from his city high school, "Eddie" has smiled with us for two years. This man is never down-hearted, and, if his personality brings ample reward, he should cash success in a short while. Eddie is to go into business with his father, and we envy the people of the "old home town" who have "Eddie" coming back to them.

This good-natured, friend-winning combination of character should go far. The school will feel its loss, even as the business world will welcome his presence.

SYDNEY GARNETT VAUGHT
Morristown, Tennessee
K Α, Z Α X

Captain Senior Pharmacy Basketball Team; Captain Varsity Basketball Team; Athletic Council; Honor Council.

In the two years that "Sid" has been with us he has proved himself an asset to the school. Not only did he captain the Senior Pharmacy Basketball Team to an unbroken string of victories, but he is also engaged now in blazing the trail in other athletics for M. C. V.

In addition to the above, Vaught, like a sailor, has "a girl in every port," but in spite of his numerous outside interests he has an enviable scholastic record. An ambitious student, a conscientious worker, and a loyal friend, he has all the characteristics which go to make up a real man and a true Southern gentleman. We are glad to have known him, and are sorry to bid him farewell.
Senior Pharmacy Class History

The first of September I received an invitation to attend the American Pharmaceutical Association, which was to be held in Washington, D. C., on the twenty-fifth of that month. As I was a believer in all things progressive in pharmacy, I secured a registered pharmacist to care for my drug store during my absence and left for Washington on the morning of the twenty-third in my Ford.

As I was nearing Washington a car passed me going full speed. Just ahead of me was another car which, in an effort to give the speeding car as much of the road as possible, had gone into the ditch. I drove up and stopped to offer my assistance, and, to my surprise, it was Gray and his wife and two children; they, too, were on their way to Washington. When he recognized me he said, "Snead is still in a hurry." As no one was hurt and no serious damage done to the car, we were soon on our way, and arrived in Washington the night of the twenty-fourth.

Glancing over the hotel register, I saw a few familiar names. Written in flourishing letters were H. H. Shiner, Ph.G., Front Royal, Va.; J. E. Orr, Pendleton, S. C.; Frank Fuqua, Valparaiso, Ind., and Mr. and Mrs. H. S. Stokes, Ferrum, Va.

The next morning I went to the association, got my program, and in looking it over, found the Pharmacy Class of '24 was well represented. The first speaker was "Ramsey" Miller, professor of pharmacy, his subject being "Importance of Technique in Pharmacy."

As I was leaving this lecture I met Turner, who was representing the "Registered Pharmacists' Association of Virginia." We walked down the street together, talking over old times. On the corner was a very small drug store. We went in to get a Coca Cola, and who was "jerking soda" but Abe Schneider, who from the force of habit was always too late to take the state board.

While we were there I began asking Turner about the different members of the class. He told me that Lewis was taking Pre-Med. work at Richmond College.

Mora had gone back to Cuba to serve his people as a well-trained Pharmacist.

Byrnes had become an efficient instructor in Pharmacognosy.

Barnes and Taylor had climbed the ladder of fame and were at work on the Revision of the U. S. P. XI.

Inheritance being stronger than training, Goldman and Schwartz were operating a cut rate drug store in Portsmouth, Virginia.

By this time we had finished drinking our Coca Cola, and I went on to the hotel. I did not attend the association that afternoon, but did the next morning. Professor W. W. White, acting superintendent of the General Hospital at Wuhu, China, gave a very interesting history of his work there. He also told of the work being done by Fuller and Dosher, who had carried their activities into Florida where they were expressing a new pharmaceutical oil obtained from the alligator.
The last day of the association proved to be very interesting. Dr. B. T. Allen, chief chemist of Department of Health, New York, gave a report on the analysis of Patent Medicine, which had been done by this board. Among the worthless products on the market was one called “Umpcallawaybo Sisqua,” which had the effect of alcohol, but did not burn when taken inwardly. This product was manufactured by Albert & Goode, of Southwest Virginia.

That night I passed the time by reading the “Skull and Bones” which I had gotten that afternoon. In the “Pharmacy Notes” I read some very informing news about the rest of the members of the class. Vaught had given up his work as a “Pill Roller” and was coaching at Yale University.

Perlstein was studying German at Heidelberg, Germany, so he could join the German Club of M. C. V.

Mr. J. R. Myers had succeeded Dean Rudd.

D. W. McGuire, North Tazewell, Va., had entered politics.

After attending this very important and instructive meeting and having the pleasure of seeing several of my classmates and getting bits of information about others, I returned to resume my duties at home.
The Class of '24

For two years we have rolled pills together,
   We have given our heart and our mind,
We have pulled through the tests tough as leather,
   Nor caring how rough was the grind.
The microbes we have chased to destruction,
   Oh! the Devil's own job we have had,
And now, as we part, there's a pang in each heart,
   For partings must be a bit sad.

And Oh! how we've murdered the English,
   Though Fackenthall stood us in line,
And worked for long hours without ceasing,
   In efforts our tastes to refine;
There is Crockett, with mortars and drug mills,
   Ever ready to lend us a hand,
But to help human ills, we must roll out our pills,
   And hie to new parts in the land,

There's the Dean the fine molecules chasing,
   In deep darkness his Genius doth pale,
When over the hills there comes pacing,
   One Nimrod to offer him quail;
Phipps, Courtney, and Miller, and Reddish,
   In wisdom's realm truly were born,
And the students all cry when "Doc" Haskell goes by,
   "Oh, where has my little dog gone?"

To Tom, Dick, to Jim, and to Eddie,
   To our mascot, Bill Layman, we fill,
To each and to all the cup sparkle,
   Like the soporific brilliance of Bill.
Good pals we have been through the struggle,
   Hand in hand in success and good will,
For the efforts we've made, we feel pretty well paid,
   But the parting is sure a bad pill.

Oh, the steep road to pill-fame we've traveled;
   We have sweated and toiled to make grades,
And many the times we have studied,
   Till dawn came to chase the night shades;
And now at the threshold we're standing,
   To make our last speech of farewell;
May the Class of '24 to high success soar,
   But goodbyes are sure hard to tell.

Junior Pharmacy Class History

On the never-to-be-forgotten day of September 12, 1923, sixty-three strong, representing the states of Virginia, West Virginia and North Carolina, we met for the first time at M. C. V., all determined to follow, for at least a short distance, the profession of pharmacy. Some had grown tired of school teaching, others of the commercial world, and probably some had been enticed by the coveted title of "Ph.G." At any rate, they sought relief (?) and rest (?) in the halls of M. C. V. The reasons for which we came were unknown, but it was not long before we were drinking at the fountain of knowledge. We soon learned, when we made our first emulsion in pharmacy laboratory, that the key which unlocks the door to the chamber of mysteries is "Perspiration" and not "Inspiration."

Nowhere has the spirit of good fellowship and warm friendship revealed itself more clearly than in our election of class officers which was held early in the session.

We have been well represented in all phases of college activities—literary, social, and athletic—especially the latter, as the Junior basketball team stood second in the contest for the cup.

Work has not monopolized all of our interests, for sometimes we have neglected our studies to fill a social engagement or attend the "Isis," knowing full well that the following day we would be the victims of sarcastic remarks from Mr. Fackenthall or unpleasant looks from Mr. Rudd, when we failed to answer their interrogations.

Many have been the snares and snores that have beset our path this session, and many a wakeful night has been spent in attempting to master the formulas in chemistry. Besides these, numerous other difficulties have confronted us, and much has been the "burning of the midnight oil" in the conflict, but soon the session will be past, and we will stand happily in the dawn of seniorhood.

With a desire to help in everything for the betterment of M. C. V. we are bound to succeed. The pharmacy class of 1925 will strive to make a record for which it and M. C. V. will be proud, and which will be an inspiration to those who come after us.

Senior Class

**Mrs. Sarah Morrison Jones**
*Morven, North Carolina*

"Sarah"

“What is worth doing at all is worth doing well.”

“A lady and a scholar” is our kind Sarah. A “down-homer” who really doesn’t know any better than to be proud of it! Pitiful! But, being a Tar-Heeler, she has won the favor of the feared G. Paul La Roque, which is saying a whole lot, for no other girl ever did.

“Hurry, hurry,” “Don’t do that,” “We’ll never get the work finished,” “I don’t see why the girls do that way—they can’t be trusted.” Sarah is our star scholar, especially in O. B., but she “doesn’t care for it at all.” Did you ever see a wrinkle in Sarah’s apron? No, nor did anybody else, for she spends all of her time off duty smoothing it out. Hope you continue through life making things smooth for others.

**Miss Mary Elizabeth Maloney**
*Gallagher, W. Va.*

"Soney"

“My tongue within my lips I rein,
For who talks much must talk in vain.”

“Soney,” our “Irish Colleen,” hails from the land of brown bread and baked beans. Just why she came to the sunny South to take up her profession we’ll never know. “Soney” has been our star pupil, and by pulling down all the highest grades in the class she has won the favor of Miss Reitz. We are not so sure that she gained these honors by diligent study, as she is our champion “Dill-Picker.” When she isn’t arguing, she finds a little time for efficient work, for which her patients are very grateful. For her we predict a brilliant future, for she always gains her point.
Miss Clara Minnie Naumann
Richmond, Virginia
"Clara"

"The last pleasure in life is the sense of discharging one's duty."

Stand up, Juniors, here comes Clara, the Senior. This serious and dignified individual landed in our midst from the suburbs of this old town of Richmond three years ago, and she has never, in all this time, ceased reminding juniors of her seniority. Clara is as studious and conscientious as she is professional, and when not studying she will be found on her way home to get a square meal.

We wish for our classmate a future of service and success, which she well deserves.

Miss Lillian Naomi Slade
Zebulon, Georgia
"Slade"

"The choicest things in life come in small packages."

Any time, any place, and anywhere you see her, Slade is wearing the smile that won't come off, even when Miss Reitz and Miss Schmak reprimand her, and this means that she is a brave little girl, for they make everybody else quake in their shoes. When you first meet her you will like her, and the longer you know her the better you will like her.

We don't know, but that is what "Harry" says. Slade hasn't decided definitely what she will do after graduating—it may be operating room supervisor, or possibly a doctor's better half. We have decided in favor of the latter. So here's to our president. We know you will make a wonderful success in either profession.
Senior Class

MISS CORA LILA MILLER  
ROLAND, NORTH CAROLINA  
"Cora"

"The best is none too good."
One glance at the above portrait will explain to you why we admire her. For three years she has struggled on with us and, though handicapped at times, she has never once failed to attain her purpose. By diligent study and close attention in her classes she has gained the distinction of being one of the foremost scholars in the class. Miller has endeared herself to us all by her pleasing personality and cheerful disposition, and we sincerely wish for her a future of happiness and success.

MISS DELLE MORRISON  
GLENWOOD, GEORGIA  
"Dell"

"I would do anything to save a friend."
Delle is our Georgia "Cracker," hailing from the land of plenty. If you don't believe, look! The future is hard and rough, but cheer up—behind each cloud there's a silver lining. We predict for Delle a very successful career as an assistant in "plaster cast," as she seems to like the art very much. Delle's chief indoor sport is talking to patients about the Georgia watermelons.
Senior Class

MISS ANNVE COSEY THOMAS
CONCORD STATION, VIRGINIA

"Tommy"

"Happy am I, from care I am free,
Why can't they all be contented like me?"

"Tommy" is the youngest and most liked member of the class. It may be her youth that we admire, but we really think it is her jovial disposition. "Tommy" has, by her magnetic personality, won her way not only into our hearts, but into the hearts of her patients, and the hearts of the doctors as well. No one can resist her, not even the "males," but "Tommy" likes them all a little—none too much. Her greatest delight is "tripping the light fantastic," and she apparently enjoys dancing with one of the girls as much as with some "sheik." And this gay little girl is a pretty good nurse, for Dr. "C. C." said so. Well, "Tommy," old dear, we hope you live forever and always have a good time.
Al's O. B.

When Lockwood drove his Maxwell for a hundred weary hours,
He thought he reached the limit of our finite human powers,
But I've learned since that Lockwood didn't have a thing on me,
For I'm doing outside service now in Al's O. B.

For Lockwood got a lot of cheers, and every time he passed,
The people cried, "Go to it, boy; we're with you to the last."
But I get no encouragement, as far as I can see,
While doing outside service in Al's O. B.

I went on just last Thursday, and I thought I'd have to quit,
When I saw the stuff I'd have to carry with me in my kit;
But he gave me my instructions—told me all I ought to know,
And I started out at midnight, just four days ago.

Four days? Tonight it seems to me to be four years instead,
For since that time I've hardly had a chance to see a bed;
I'm weary, tired, and sleepy, but I know this isn't all—
Just pardon me a moment, while I answer this phone call.

The first night I was told, at just a quarter after two,
That a dusky maid in Fulton was all ready to come through;
I started out, and got there in a storm of driving rain,
And waited for two hours, but she never had a pain.

I came away, and told them they would have to call once more;
The next call came at just about six minutes after four;
This one was down on Clay street, and I only had to wait
Four hours, for I dressed the kid at a little after eight.

Another call at ten o'clock, and not a bit too soon,
Because a pair of twins were born and crying before noon.
Between that time and bedtime I went out to see two more,
Though my eyes were getting sleepy, and my feet were getting sore.

And so it goes—the minute that I try to get a rest,
The phone rings, and I have to start north, south or east or west;
I don't get time to do a thing all day, nor yet at night,
For it's "babies, babies, everywhere, and no relief in sight."

The minute that the sun goes down, or when it starts to rain,
There's some dark damsel waiting to be taken with a pain;
They're all a mile away from any car line I can get,
I don't think I could handle one unless I first got wet.

I'd like to tell you more, but I'm afraid I'll have to quit,
A call came just this minute—I must go and get my kit;
So if Lockwood thought that he was tired, I wish that he could see,
A student when he finishes with Al's O. B.
Intermediate Class
IGHTEEN more months and we will be at what has been set as our goal—R. N.'s! The last you heard from us was that we were struggling to gain the recognition of the staff for our efficiency, and endeavoring to gain their trust in us.

Now, a year later, we have become Juniors, and we hope that we have become known and trusted by the visiting doctors. We have tried to live up to the expectations of our supervisors, and we feel that they believe we are worthy to be Memorial Nurses.

We thought we knew something last year, but each day we realize that possibly we will never know as much as we thought we knew then. Experience has taught us efficiency. We've learned to depend on ourselves and not others, as we used to do. We've been happy, and have enjoyed our work more because we have become accustomed to the ways of Memorial. The Class of 1925 still has a long, long road to travel, but now—we count the time by months instead of years.
FACULTY AND STUDENTS HAVE GREAT MEETING

Get-Together Meeting is Record Breaker. Splendid Program. Good Eats, Good Music, Good Speeches. Attendance About 400.

M. C. V. Plays Wonderful Game vs. Lynchburg

Students at the Medical College of Virginia played to great game of the season when they took on the Lynchburg team on the 27th. The match was not only the last time in the season for Lynchburg, but also the last game for M. C. V. at home.

The game was a very close one, with both teams playing to their best. The attendance was large, and the stands were filled with enthusiastic students.

The faculty, however, were not satisfied with the game, and they made the necessary arrangements for another match.

APOLLO CLUB DEFEATS M. C. V.

On Thursday, February 25th, the Apollo Club defeated the M. C. V. team in a close game of basketball. The Apollo Club was victorious by a score of 40 to 35.

The game was a hard-fought one, with both teams playing to their best. The Apollo Club was the stronger team, and they managed to hold their own throughout the game.

Dental Students to Have Help of Nurses

Plans are being arranged to place a new dental office in the hospital, which will be used by nurses assisting in the work. The nurses will be given special training in dental hygiene.

Medical College vs. Randolph-Macon, Wednesday, Feb. 27. Come Support our Team
Passing the Pen

When we, the staff of the Skull and Bones, pass our pens to our successors, it is with a feeling that we are "passing the buck." However, we are shirking nothing. We have run our part of the race. The eager hands of the new staff must now reach forward and relieve us, for we have put forth a great effort and are almost exhausted.

It is too late now to urge us on to further effort. You must now give your support to the new staff. We feel that we have run our race well, considering the many handicaps that have faced us. We have failed to keep the pace which we set at the start, but before criticising, ask yourself if you have given the paper your support.

There have been things in it that should have been left out and things have been left out that should have been in it. But don't criticise. Our best intentions were back of everything and we have always tried to furnish entertainment, news, and be of help to students and school.

We see the need for the paper. It is every student's duty to subscribe. The work is hard enough with your support, and without it nothing can be accomplished. We feel deeply indebted to our readers who have been of such a help to us, and, for the sake of the new staff, hope that you will help them even more.
Athletic Editorial

During the year just closing, athletics at the Medical College of Virginia took on a new lease of life. Under the efficient leadership of its president, John Edwin Dougherty, the Athletic Association labored hard and faithfully that our college might again hold in the world of sports the place to which it is justly entitled. The results have been more than pleasing, and the association feels well repaid for the efforts it put forth.

There have been many handicaps. The lack of a gymnasium and the lack of an athletic field are only two of the many things with which we had to contend, but these situations can be, and we trust will be, remedied in the future.

M. C. V. should hold in the sport world the same enviable place it holds as an educational institution. Among the matriculates every year, in medicine, dentistry, and pharmacy, are many letter men from other schools and colleges, men who should form a nucleus capable of carrying any aggregation to success in their several fields, and we sincerely hope that in the future advantage will be taken of the wonderful opportunities the school has in athletics.

During the past year a constitution was drawn up. For this purpose suggestions were taken from the constitutions of a number of other schools, and the necessary modifications made before it was adopted here. A start in athletics has been made. If those who follow will do their best to "carry on," great things await M. C. V. in the world of sport.
Speaking of Being Good

How Would You Like to Be Able to Locate

A hernia that Paul La Roque can’t find upon palpation?
A rale that Garnett Nelson cannot hear on auscultation?
A gall-stone for which Willis cannot find conclusive proof?
A case of gastric ulcer that would get by Vander Hoof?
A tumor of the brain that Doctor Coleman could not find?
A disease for which “Doc” Hutcheson can’t tell the cause behind?
A speck of dust on Graham, any place from head to feet?
The things that Doctor White thinks when his roll is not complete?
An inattentive Senior, when Call lectures to the class?
A germ that Doctor Sharpe would miss, when he got it on a glass?
A germ on Doctor Peple, when he starts to operate?
A “Ku Klux” who would take a chance on joining Section Eight?
A smile from Doctor Haskell, when you kill a dog too quick?
The dills that any student tried with Geisinger to pick?
“E. C. L.’s” idea of creation in six days?
Or Mr. Mac’s affection for “the man who never pays?”
Wishes

I would that I the message were
That I to you had sent,
Or just some little trinket’s spur
You wear for ornament.

Mayhap the wrap that ’round you winds,
Or just the tiny ring
That ’bout a slender finger twines,
Like some celestial thing.

So would I drink the crystal blue,
And into vistas deep,
That cast on me their fragrant hue
I’d peep, and peep, and peep.

Or I about your downy throat
A locket, pendant hung,
I’d hear fore’er the thrilling note
Your rhythmic glad heart sung.

And if the wrap, I’d proudly fold
In snug and firm embrace
Your tender, fragile form, and hold
It so with wondrous grace.

But should in golden hoop I round
About your finger gleam,
I’d closely clasp the treasure found,
And ever after beam.

H. Neifeld.

After Awhile

When the last dread disease has been wiped from the earth,
   When the causative germs disappear,
When mankind gets all out of life that life's worth,
   With nothing to hinder, or fear;
When the last pathogen has gone down to defeat,
   And this old world holds only the best
That God gave us, then living indeed will be sweet,
   And the Doctor—the Doctor can rest.

From the first day that man clambered down from the trees
   And walked upright, his face to the sky,
His foe has been dirt, with the germs and disease
   That it breeds, but he didn't know why,
The hordes of Attila, who ravished the land,
   Leaving barren the plains once so blessed,
Were nothing to these, and as long as they stand,
   The Doctor must never seek rest,

For back of the fall of the Empire of Rome—
   Yes, back to the eve of the Flood,
We know 'twas disease that took love from the home,
   And sapped from the world its life's blood,
There was no one to battle, and no one to save,
   None so strong as to make the great test,
'Till the Doctor evolved, who was willing to brave
   The perils, and work without rest.

He must stand, all alone, with his back to the wall,
   Unfearing, undaunted, and firm;
And pity the world if the Doctor should fall,
   It would then be a prey to the worm,
But some day his struggles will meet with success,
   The rainbow at the end of the quest,
The earth will be free from disease, and distress,
   And the Doctor—the Doctor can rest,

Perhaps

When Doctor RaRoque cuts out smoking;
When Hutcheson says, "I don't care";
When Doctor Joe White stops his joking;
When Willis puts grease on his hair;
When Nelson slips up on a case of T. B.;
When a good check is turned down by "Mac";
And when all diabetes become sugar-free,
Then maybe "Doc" Cook will come back.

When Haskell wears spats and a wrist-watch;
When you see Doctor Johns with a cane;
When our friend, Clifford Folkes,
Drinks, and chews, swears, and smokes;
When Call can't find the cause of a pain;
When these things occur, he may come back again
When you see whiskers grow on a clam;
Until then he can stay
Just as far, far away
As he likes—and we don't give a damn.
The X-Ray. 1924

Through

How dear to my heart are the scenes of my childhood,
When I was a Freshman, with nothing to do
But read my anatomy, just a child would,
And look at the stiffs to see if it was true;
For an hour a day Lizzie would keep us all busy,
As he spoke of the atom and quaint molecule,
This, with some histology and embryology,
Made up my first year in this medical school.

No less dearer to me is the year that came after,
When my name was put on the Sophomore roll,
As driven by Charlie, with tears and with laughter,
I got many new kinks in the shades of my soul;
There was Cook, with his slides, and his tumors, and cancers,
And E. C. L., also, with knowledge profound,
As he taught us to look through the truth to the answers
For all things on, under, or over the ground.

My Junior year also was real easy pickin’s,
When I had my first look at the people who ail;
Under Vander Hoof, Nelson, and Miller, and Higgins,
I learned what to do for the organs that fail;
Though at times it got breezy, all in all it was easy,
And very much like the two years gone before,
But now, as a Senior, how changed my demeanor,
And the days of my childhood are gone, evermore.

For now I must think, and, mygosh, how I dread it,
And the things I must know are not printed in books;
I must diagnose cases from eye-grounds or faces,
Though I cannot depend on how anything looks.
But it’s done, though the doing has caused me to keep thin,
As thin as the paint on an old cupboard shelf,
But I got that old sheepskin, that darling old sheepskin,
And now I can go out to work for myself.

THE FLES
The Fles

FRIENDSHIP, Love and Economy, and the greatest of these is economy. This is absolutely the oldest organization of its kind in the world. Other similar organizations date their time of origin by years, but the Fles date theirs by centuries. This ancient society was founded by an ancient Egyptian in the great University of Egypt at the time Egypt was in the prime of her prosperity and the center of education of the world. This man did not have magnetism nor the ability to draw men unto him in friendship and brotherly ties, so in his loneliness and solitude he planned an organization which should have Friendship, Love and Economy as the basic principles.

At first the membership was limited to medical students, later the invitation was extended to dental students, and those who belong are ever ready to aid a brother F. L. E. It is not the kind that crawls up your back and bites you under the shoulder, but F. L. E.—Friendship, Love and Economy. You may go into church, school, college, or anywhere, call "Yea Brother," give the distress signal, and brothers will gather around and pat you on the back.

It costs you nothing to get in and a lesson to get out. Your widow is promised nothing when you die, but brothers will gather together from far and wide to mourn at your grave and place flowers thereon.

To pass the initiation one must be a man of definite convictions and with the ability to be concise in all his speech. Remember the F. L. E.—Friendship, Love and Economy, and the greatest of these is economy.

Snappy Clothes

905 EAST BROAD STREET
RICHMOND, VA.
Johnston-Willis Hospital

Corner Kensington and Colonial Avenues
Richmond, Va.

Capacity, 125 Beds

Modernly conducted, including hydrotherapy, massage and electricity. Training school for nurses, including six months' affiliation and obstetrics in surgery.
MEDICAL COLLEGE OF VIRGINIA
(State Institution)

STUART McGUIRE, M.D., President
RICHMOND, VA.

Medicine
Pharmacy
Dentistry
Nursing

Separate Faculties. Well-equipped Laboratories Under the Direction of Full-time Competent Teachers

The Medical College of Virginia owns and controls the Dooley Hospital, the Memorial Hospital, and the Saint Phillips Hospital. These three constitute a modern hospital plant for the care and treatment of patients without regard to race, creed or color, and have facilities for coping with medical, obstetrical and surgical conditions. These hospitals have beds for 364 patients, in private rooms and in general wards.

Additional clinical facilities are offered through the City Home, City Jail, and other institutions in the city of Richmond.

COLLEGE ANNUAL HEADQUARTERS
IMITATION is the sincerest form of flattery and attempts have been made to imitate this cabinet. It is unique and original and far ahead of anything else in dental cabinets.

Sheraton and Chippendale were in advance of their time in the art of cabinet making, and our No. 120 Dental Cabinet has an air of the future that is hard to deny.

*American Cabinet No. 121*—This is the same as No. 120, except that it has wood drawer bodies instead of steel, metal-lined white enameled medicine closets instead of glass and chipped glass in doors.

*American Cabinet No. 122*—Same as No. 120 except that it has wood drawer bodies instead of steel.

*Terms*—Our goods can be combined with other equipment such as chair, unit, engine, etc., and purchased on one contract on easy monthly payments.

J. H. ROYSTER, M.D., Asso.

The magnificent suburban home of the late Major Ginter, by alterations and extensive additions, has been transformed into a private institution for the treatment of nervous diseases, mild mental cases and select alcohol and drug habitues.

The grounds are ample, quiet is assured, and a new building for men makes easy separation of sexes. A number of cottages make possible satisfactory and congenial grouping.

Rooms single or en suite, with or without private bath. Hot water heat, electric lights, artesian water. Bowling, tennis, croquet, billiards and a gymnasium afford recreation. Electrical and Hydrotherapy equipment. Nurses and attendants trained for this special work. Four physicians reside in the Sanatorium and devote their entire time to the patients.

Private Rooms

Private rooms, with accommodations for one, two, three and four patients have been provided. The charges for general board and care are from $3.00 to $5.00 per day, which includes general nursing care, the services of the Resident Physician and the House Staff, medicines and prescriptions compounded in the Hospital Pharmacy, and surgical dressings.

All reputable Physicians and Surgeons in Richmond have full privileges (including the use of the Operating Rooms) to treat patients occupying Private Rooms in any of the Hospitals.

Other charges for ambulance service, laboratory examinations and the use of Delivery and Operating Rooms are reasonable.

Public Wards

The charge for patients in the Public Wards is $2.50 per day which is in full for all examinations and service necessary, there being no extra charges.

The privilege to treat patients occupying beds in the Public Wards is restricted to a group of Physicians and Surgeons appointed by the Executive Committee of the Board of Visitors, selected from the Faculty of the School of Medicine of the College. Physicians and Surgeons do not receive a fee or any emolument for services rendered by them to Ward Patients.
"Formulas for Infant Feeding"

New Edition

A thoroughly revised edition of our book, bound in leather, is now ready, and a copy will be mailed to physicians upon request.

To give some idea of the magnitude of this new work and how well it keeps step with the progress in infant feeding, we display below two pages of this 80-page book. It will be noted that the formula adjusted to age and weight, together with simple instructions for progressive changes, is given on the left-hand page, and on the right practically every detail relative to the balance of nutrition is stated. This plan is followed throughout the book, thus giving information of daily usefulness not accessible in any other work of this nature.

**Whole Milk Formulas**

For Infants about Three Months Old

(Average weight 12½ pounds)

<table>
<thead>
<tr>
<th>Mellin's Food</th>
<th>6 level tablespoons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Whole Milk</td>
<td>16 fluidounces</td>
</tr>
<tr>
<td>Water</td>
<td>16 fluidounces</td>
</tr>
</tbody>
</table>

(This amount is sufficient for 24 hours.)

Give the baby 4½ ounces every 3 hours; 7 feedings in the 24 hours.

Increase the quantity of milk one ounce every sixth day until the amount of milk is 21 ounces, and decrease the quantity of water one ounce every fifteenth day until the amount of water is 14 ounces; then prepare the modification according to the formula for an infant four months old.

Details relative to the nutritive value of the above modification will be found on the opposite page.

**Analysis of the Forgoing Mixture**

<table>
<thead>
<tr>
<th>Fat</th>
<th>Proteins</th>
<th>Carbohydrates</th>
<th>Sugars</th>
<th>Water</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.81</td>
<td>2.12</td>
<td>5.54</td>
<td>.52</td>
<td>90.01</td>
</tr>
</tbody>
</table>

100.00

Weight in Grams of Food Elements in the Forgoing Mixture

Fat = 18.10 Grams
Proteins = 21.28
Carbohydrates = 227
Salts = 5.17
A total of 99.94 grams of well-balanced nourishment.

Calories Contributed by Food Elements in the Forgoing Mixture

Fat = 165 Calories
Proteins = 87
Carbohydrates = 227
Total Calories in mixture = 482
Calories per fluid ounce = 15.4
Energy-quotient, or Calories per pound of body-weight = 39.3

The amount of protein in the foregoing mixture equals the protein in 1.63 ounces of whole milk to each pound of body-weight.

Special formulas calculated to meet conditions other than normal, with suggestions for their practical application, broaden the scope of the work, which in its entirety marks a distinct advance toward a better understanding of infants' nutrition.

A New Ritter Book

"RITTER PRACTICE BUILDING SUGGESTIONS", a book for thinkers who are interested in success. Over 200 pages full of practical suggestions for your assistance in establishing and building a successful dental practice. Many successful careers owe their start to a simple sound suggestion. This book contains hundreds of them.

A successful practice cannot be guaranteed by anyone. That is an intangible thing influenced by your own personal characteristics. We can, however, offer suggestions that will help you succeed. This we have done, in a concrete helpful way, in "RITTER PRACTICE BUILDING SUGGESTIONS."

One copy of the students' edition of this book will be presented to each graduating student in all dental colleges this year. To obtain your copy you have only to attend our exhibit at your college, particulars of which will be sent to you later.

**SCIENTIFIC not EMPIRICAL**

Remove the Antiphlogistine dressing at the end of twelve hours and examine it. The center will be wet provided there is an inflamed area beneath it; an outer zone merging into the center will be moist, and the part which has covered healthy tissue will be comparatively dry.

In the outer zone the blood is flowing freely and uninterruptedly, through the underlying vessels, forming a current directed away from Antiphlogistine. Its liquid contents therefore follow the direction of least resistance and enter the circulation through the physical process of endosmosis. In the center zone there is stasis, no current tending to overcome Antiphlogistine’s hygroscopic property. The point of least resistance for the liquid exudate is therefore in the direction of Antiphlogistine—exosmosis is going on in the zone, hence the excess of moisture.

Osmotic booklet will be sent **FREE** upon request
